**Map of the United States.**

A large, handsome Map of the United States, mounted and suitable for office or home use, is issued by the Burlington Route. Copies will be mailed to any address on receipt of fifteen cents in postage by P. S. Eustis, Gen'l Pass. Agent, C., B. & Q. R. R., Chicago, Ill.

**The Heart.**

All the blood in the body passes through the heart in three minutes. This organ pumps each day what is equal to lifting 122 tons one foot high. The lungs will contain about one gallon of air at their usual degree of inflation. We breathe on an average 1,200 times per hour, inhale 600 gallons of air, or 24,000 per day. The aggregate surface of the air-cells of the lungs exceeds 20,000 square inches.

**Cranks Wanted.**

To cranks the world owes its greatest reforms. There is one building and loan crank in every community and we want to know them. Send your card to the National Building and Loan Herald, 136 Liberty street, New York, N. Y.

NEARLY every county in England has its favorite oak, the largest of which is the Cowthorpe of Yorkshire.

Dyspepsia, Heartburn, Headache, Lassitude, Spring Fever, all debilitation and irregularities fly before Smith's Bile Beans *Small*.

LINCOLN'S father was a poor farmer and laborer.

N. K. Brown's Essence Jamaica Ginger will cure indigestion. None better. Try it. 25 cents.

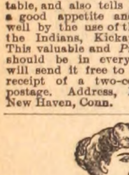
*IT'S RATHER TOO MUCH FOR YOU*

—the ordinary, bulky pill. Too big to take, and too much disturbance for your poor system. The **smallest**, easiest to take, and best are Dr. Pierce's Pleasant Pellets. They leave out all the disturbance, but yet do you more good. Their help *lasts*.

Constipation, Indigestion, Bilious Attacks, Sick or Bilious Headaches, and all derangements of the liver, stomach, and bowels are prevented, relieved, and permanently cured. They're *guaranteed* to give satisfaction, or your money is returned.

If you're suffering from Catarrh, the proprietors of Doctor Sage's Catarrh Remedy ask you to try their medicine. Then, if you can't be cured, they'll pay you $500 in cash.

**FREE!** A sensible Cook Book for practical people. Tells how to make the best Brown Bread, the best Meat Stews, the best-liked Fish or Meat Hash, Plain Cake, Apple Pie, Baked Beans, Doughnuts, Delicious Puddings from odds and ends. Tells how to economize and still set a good table, and also tells how to always have a good appetite and keep strong and well by the use of the grand remedy of the Indians, Kickapoo Indian Sagwa. This valuable and *Practical* Cook Book should be in every kitchen; and we will send it free to any address upon receipt of a two-cent stamp to pay postage. Address, Healy & Bigelow, New Haven, Conn.



KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and $1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

**TRAVELING MEN!** A SPLENDID SIDE LINE For Traveling Men who visit many towns. No samples to carry and no sales to make. The work can be done in a few minutes while waiting for trains. No expense attached to it—clear cash profit. Many traveling men now making their daily expenses with it, all without taking any time from their regular business. Write to day for particulars, giving permanent address.

"HOWINS," Lock Box 818, Chicago, Ill.

**PENSION** JOHN W. MORRIS, Washington, D. C. Successfully Prosecutes Claims. Late Principal Examiner U.S. Pension Bureau. 2 yrs in last war, 15 adjudicating claims, atty since. MENTION THIS PAPER WHEN WRITING TO ADVERTISERS.

**FAT FOLKS REDUCED** From 15 to 35 lbs a month. Harmless treatment (by prescription) by physician. No starving. Thousands cured. Send 6c in stamps for book. O. W. F. SNYDER, M. D., Mail Dept. 2, McVicker's Theater, Chicago, Ill.

S. N. U. No. 26—93

BEST POLISH IN THE WORLD.

**RISING SUN STOVE POLISH**

DO NOT BE DECEIVED with Pastes, Enamels, and Paints which stain the hands, injure the iron, and burn red. The Rising Sun Stove Polish is Brilliant, Odorless, and Durable. Each package contains six ounces; when moistened will make several boxes of Paste Polish.

HAS AN ANNUAL SALE OF 3,000 TONS.

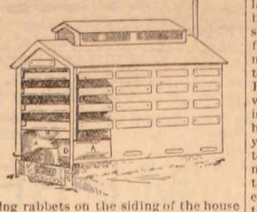
# REAL RURAL READING

## WILL BE FOUND IN THIS DEPARTMENT.

**Where the Castor Bean is Raised, and the Different Uses of Its Oil—A Cheap and Good Fruit Evaporator—Cutting Clover too Early.**

**A Home-Made Fruit Evaporator.**

The illustration, from Farm and Home, shows a cheap and good evaporator that will do more than twice the work of some high-priced machines. It is built of wood. The frame is made of 2x2 in posts and 2x3 in. horizontal drawer rests. The drawer rests are placed flatwise between the posts, rabbeted ¼ in. on either side to receive the drawers. The sides and backs of the drawers are 1½ in. wide; the front is 2 in. wide, with a ½ in. rabbet above and below on the inside and there are correspond-



ing rabbets on the siding of the house so that when the drawers are pushed in the outside surface will be smooth. The bottoms of the drawers are made of galvanized wire cloth. There is a false front to each drawer, 3 in. back. The upright posts are 2½ ft apart. The drawers are 3½ ft apart, with a false front 3 in. back; this gives a 3 in. space at each end of the drawers for free circulation of air. The end drawers are 4 in. deep and 5 ft long, and are used to finish on. Have four extra drawers, and have some extra front pieces to put in and close up the openings when the drawers are out. The sheet-iron fenders, A, B, extend the whole length, to distribute the hot and cold air. The cold air enters the ventilators below A, and is divided by B. The arch C is sheet-iron, with a 2-in. flange resting on the wall of the furnace, which is 2 ft high and 2 ft wide, laid in mortar. The top course of brick is laid in mortar on the flange to prevent the escape of smoke. The building is 10½ ft long, 7 ft high and 4 ft wide. D D are connecting rods attached to the ventilators. The furnace can be built below the surface on sloping ground. The amount of heat is great, and the thing to be observed closely is to admit plenty of cold air through the ventilators.

**Wooden Walks to the Barn.**

While it is not best on account of fires to have the house and barn near, there out to always be a board or plank walk between the house and barn, and another from the house to the road. Only a board walk elevated two or three inches from the ground will protect the grass from being trampled in the wet weather, when trampling is most injurious. A mud walk from house to road or to barn, and trampled in and out several times a day, has destroyed the comfort and happiness of many a farmer's home. It the city board or stone walks are thought a matter of course. They are quite as necessary in the country, and their cost is trifling in comparison with the saving of labor indoors that they effect.

**Feed for Poultry.**

A quart of corn, twice a day, to twenty hens, is supposed to be a proper allowance, but no estimate can be arrived at, as hens will not thrive on corn alone, nor will all hens in a flock eat alike, or prefer the same kind of food. When feeding the hens give them a variety, but never give them more than they can eat up clean. It is better to give too little than too much. In the winter the hens should have two good meals each day, but in summer one meal is ample. If they are on a range it is safe to assert that one-half of the quantity supposed to be a meal will be sufficient. The poultryman must observe his flocks and judge of their wants by the amount of forage on the range.

**Extra Feed for Young Pigs.**

There are comparatively few large milkers among sows. The whole breeding of the hog has for so many generations been diverted to fat production rather than milk production. In a large litter of pigs extra feeding must be begun so soon as the pigs can begin to eat, which will be when they are a week or ten days old. Skim milk from cows is the best feed, but with half milk and half dish water a nourishing swill can be made by adding fine wheat middlings with a very little linseed-oil meal. Pigs thus fed will grow as well as fatten, and will be always thrifty.

**Cutting Clover Too Early.**

There is a certain time up to which clover will not be eaten by cattle if they can get any grass. We have seen them often in May and until near the first of June eating the grass out of the corners of fences bare to the ground, while large mouthfuls of clover would be passed by untouched. But so soon as buds and blossoms begin to appear they would be greedily eaten, and in a very few days the whole plant would be eaten. About the time the clover is in full blossom is therefore the best time to cut it for hay, the cow being the judge.—Ex.

**Oats for Working Horses.**

The hull of the oat gives this grain more bulk in proportion to weight, and this is one reason why it is the best feed for horses. Another quite important reason is that the kind of nutriment it contains is rather for giving strength than for making fat. But whole oats are not perfectly digested, and to give most good they should be ground with equal bulk of corn and fed with cut, moistened hay. This is the standby for working horses. It is quickly eaten, easily and thoroughly digested, and if care is taken not to leave some to stand and sour, then teams can be kept on this cut feed for weeks and be in better heart at the end of their work than when they begin.

**The Castor Bean.**

The castor bean is a native of the West India Islands where it grows in great luxuriance. It is cultivated as a field crop in our lower Middle States and also in the States bordering the Ohio River on the north. It is raised extensively in India where there are two chief types; one a large bush or tree-like form, the other a much smaller variety. The seed of the larger produces an abundance of oil but of an inferior quality, while the seed of the lower growing variety furnishes the oil which is used as a medicine. The manner of cultivation, according to the Orange Judd Farmer, is essentially the same wherever raised. In this country it is planted in a rich mellow soil and hoed much the same as corn. It yields beans at the rate of twenty to thirty bushels per acre. There are a number of different methods of extracting the oil from the seeds. By experiments which have been made, the "cold drawing" process as it is called, extracts the most oil and the product is also better than that obtained by other methods. In this process the seeds are separated from the pods, bruised and subjected to a

THE CASTOR BEAN.

great pressure. They thus yield nearly a gallon of oil to the bushel. There are different grades of the oil, some being used extensively for lamp oil, especially in India, where the castor bean is raised very largely. The slowness with which it burns and the excellent light which it gives combined with its freedom from danger are great recommendations for its use. An excellent paper pulp is made of the bark from the stems. Castor oil is frequently used by the Indian dyers and has the reputation of being one of the best for dressing tanned hides and skins, as it repels rats and other vermin and does not interfere with subsequent polishing. This oil is also much used for lubricating all sorts of machinery. The pomace left after the oil is extracted is very highly esteemed as a manure, chiefly for the nitrogen it contains. It forms an excellent basis for enriching composts or for top dressing grass lands.

**Usefulness of Hay Tedders.**

For a long time we were incredulous of the value of hay tedders. The mowing machine leaves the grass spread evenly over the surface, and not lumped in a swath as did the old-fashioned scythe. It seems theoretically that the hot sunshine should dry through this thin surface without any need of being shaken up. But the sun evaporates moisture from the soil beneath the cut hay, and thus, while the top is dry, the grass beneath is kept from drying as it should. The tedder shakes up the grass, exposing the whole to air and sunlight, and it is therefore ready to be raked up almost as soon as tedded. This also is a great advantage in "catchy" weather, such as that in which most hay is made.—American Cultivator.

**Danger From Cold Drinks.**

Man is the only animal who craves ice-cold drinks in hot weather. The wiser instinct of all domestic animals prefers water near the temperature of the surrounding air in Summer, and in cold weather that which is near the blood heat. Cows will often drink from some muddy pond while refusing clear water from a deep well. To get them to drink the latter it should be pumped several hours before using and allowed to warm all it will in the sun.

**Cows Going Dry Too Long.**

The time that a heifer is allowed to go dry after her first calf is dropped affects her habit in this respect all her life. It is not necessary for a good cow properly cared for to go dry longer than from three to four weeks. The very best cows can hardly be dried off, the inbred tendency to milk product on having been developed so strongly.

**Interesting Experiment.**

A New Braintree (Mass.) farmers club, composed of men and women is a progressive and admirable organization, it is evident. It sets apart a woman's day when all the addresses, essays, and music are prepared by women, and the dinner is cooked and served by men. No report is at hand of the success of the undertaking.

SPEAKING about ornithology, did you know that larks were bred from swallows?

THE U. S. Government Chemists have reported, after an examination of scores of different brands, that the Royal Baking Powder is absolutely pure, of highest leavening capacity, and superior to all others.

**English "Old Clothes."**

The cry of "Ggh clo," which is said to have so irritated Coleridge on one occasion that he remonstrated with the Jew who was giving it, is often heard in parts of London. It heralds the approach of the buyers of the cast-off articles, which are furbished up, scoured, cleaned, pressed, and then sold again. The travels of old clothes are very curious.

The persons who prepare them for sale are called in England by the strange name of "clobberers," "revivers" and "translators." The duty of the "clobberer" is, by patching and sewing up, to restore the garment to its original appearance.

"Revivers" try to make black cloth garments look as good as new again, and succeed quite well, although the gloss they put on soon passes off. The "translator's" work is of a higher kind; he has to change one garment into another; for instance, to make waistcoats or tunics for children out of the skirts of a man's coat, which are the least worn part.

Black cloth clothes that are too far gone to be "clobbered" or "revived" are sent to France, Russia and Poland, to be made into caps, which all the working people of these countries wear.

The cast-off red coats of the British soldiers almost all go to Holland, for in that damp country the people have a notion that red cloth keeps off rheumatism; therefore all the fishful Dutchmen of the laboring classes wear red cloth waistcoats next their skin. These are made by cutting off the sleeves of the British soldiers' red coats and altering the shape a little, though the Dutchmen, presumably, do not know this.

The showy uniforms of the guards, the full-dress liveries of the Lord Mayor's footmen, or of the royal servants, even the laced coats and cocked hats of beadles, come into the hands of the old clothes dealers, and go chiefly to the south coast of Africa, where they are sold to the native chiefs.

English travelers are sometimes amused at being received in full state by a swarthy chief on his throne, dressed out in a footman's livery or a rifleman's uniform.

The gray greatcoats of the infantry find their way to the agricultural districts; the more valuable cloaks of the artillery are sent to Holland; and that country and Ireland absorb the cast-off clothing of the police.

Old clothes that can neither be "clobbered," "revived" nor "translated" go to Newsburyand Leeds, where they are torn into "shoddy" by huge toothed wheels, and after being mixed with some fresh wool they come out as "pilots," "beavers," "mohairs," or other fabrics which happen to be fashionable.

It is said that "shoddy" and "mungo" supply the materials for a third of the woolen manufactures of the country.

**A Chance for Health**

Is afforded those fast sinking into a condition of hopeless debility. The means are at hand. In the form of a genial medicinal cordial, Hostetter's Stomach Bitters embodies the combined qualities of a blood fertilizer and depurent, a tonic and an alterative. While it promotes digestion and assimilation, and stimulates appetite, has the further effect of purifying the life current and strengthening the nervous system. As the blood grows richer and purer by its use, they who resort to this sterling medicinal agent acquire not only vigor, but bodily substance. A healthful change in the secretions is effected by it, and that sure and rapid physical decay, which a chronic obstruction of the functions of the system's produce, is arrested. The prime causes of disease being removed, health is speedily renovated and vigor restored.

**A Sailor's Opinion of Columbus.**

Landsmen have a much higher opinion of Columbus than seamen. An old salt in New York, on beholding the little caravels, exclaimed: "Christopher Columbus was a —— fool!"—St. Louis Post-Dispatch.

**Women in the Minority.**

All the world over there are ninety-eight women to one hundred men.

**And Rival Legislatures.**

Kansas is the only State in the Union that produces reeled silk.

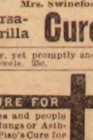
THE pleasant coating of Beecham's Pills completely disguises the taste without impairing their efficiency. 25 cents a box.

THE amount of air that a man will inhale in twenty-four hours will fill seventy-eight hogsheads and weigh fifty-three pounds.

Put up in neat watch-shaped bottles, sugar-coated. *Small* Bile Beans.

A SINGLE tobacco plant will produce 360,000 seeds.

**Swellings in the Neck**



Mrs. Swineford.

Or goitre, made my neck fully twice its natural size. For 3 years all my strength seemed to go into the swelling. I took Hood's Sarsaparilla, which gave me strength, relieved distress in my stomach, and, best of all, entirely removed the goitre. I am now in the best of health, and weigh 195 pounds." Mrs. H. C. SWINEFORD, Union County, Middleburg, Pennsylvania.

**Hood's Sarsaparilla Cures**

Hood's Pills act easily, yet promptly and efficiently, on the liver and bowels. 25c.

PISO'S CURE FOR Consumptives and people who have weak lungs or Asthma, should use Piso's Cure for Consumption. It has cured thousands. It has not injured one. It is not bad to take. It is the best cough syrup. Sold everywhere. 25c. CONSUMPTION.

**Babies' Bedtime Stories.**

"I wish I were able to write all the go-to-sleep stories that are told to the little folks all over the land every night," said a tender-hearted mother the other day. "It makes me positively sad to think of the small brains that are filled with distorted images, hobgoblins, ogres, giants and the like, just as reason is loosing its hold upon them for several hours. I don't think mothers realize what an influence upon a child's life, and even upon its life after it has ceased to be a child, is exerted by this apparently trifling matter of how it goes to sleep.

"Every night when I watch my little daughter working off the big thoughts that sweep over her brain, as her tired body begins to relax while her mentality seems to be briefly and proportionately stimulated, I tremble to think of the harm that could be done to her or any child—for Mabel is not an abnormal child in any way—by an ignorant nurse or thoughtless parent.

"The fact that every normal child cries out for a bedtime story shows that its mental nature needs it just as its physical nature craves sweets. You want to give your child pure candy, so give him the unadulterated story. Leave out the fearful personalities, the grim and gigantic figures—these, even if they are properly vanquished by the gallant hero, are too distinct for the cribside tale.

"Sit down by your little one's bed and speak low and evenly. Weave a fanciful but quiet story that tells of pretty fairies, and birds, and flowers, and droning bees, and loving little boys and girls—these woo sleep to the weary but still active brain, not with the suffocating pressure of the gathering storm lit with lurid flashes, but with the soft clouds of the sunset horizon that change from rosy pink to tender enveloping gray, and gradually deepen into restful gloom."—New York Times.

**Magnetic Mineral Mud Baths for Health and Strength.**

The only place in the world that you can enjoy the luxury and benefits of a Magnet C Mineral Mud Bath is at the celebrated Indiana Mineral Springs, Warren County, Ind. It is nature's own remedy for the treatment of the worst forms of rheumatism, kidney and liver trouble, skin and blood diseases. A $150,000 hotel and bath-house, steam-heated, electric-lighted, all modern improvements, furnishes the very best of accommodations. In point of cost, you will be better and more satisfactorily taken care of, with the absolute certainty of deriving greater physical benefit, than you can get elsewhere in this country. Located on the Chicago & Eastern Illinois Railroad. 129 miles south from Chicago. Send to H. L. Kramer, P. O. Box A, General Manager, Indiana Mineral Springs, Warren County, Ind., for beautifully illustrated printed matter, which will tell you all about it.

**A South Atlantic Cable.**

The eastern and western hemispheres have been for many years brought into close relations in their northern parts by means of electric cables, and now a similar bond has been wrought between their southern members. South America and Africa have been thus joined by the new cable from Cape St. Augustin, Brazil, to the western extremity of Africa, the cable terminus at that point being near Cape Verde and the mouth of the River Senegal. The distance thus traversed is about 2,500 miles; and at the African station connection is made with the Spanish line by way of the Canary Islands to Cadiz and thus to all parts of Europe. Dispatches can now be sent from Pernambuco to Paris and London.

**Catarrh Cannot Be Cured**

With LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free.

F. J. CHENEY & CO., Props. Toledo, Ohio.
Sold by druggists, price 75c.

**Comprehensive Report.**

The entire report published by the Baltimore American of the inaugural ceremonies of James Madison consisted of five and one-half lines. Many papers devoted as many pages to the inauguration of Cleveland.

THE best 5c soap in the world is Dobbins' Perfect Soap. Have your grocer get it and try for yourself. It is sure to revolutionize the trade and use of soap. Dobbins' Soap Mfg. Co., Philadelphia, Pa.

It is stated that in England those parts of locomotives which are liable to rust are made of galvanized iron, and that this includes the inside of tender tanks and also the coal spaces.

FOR weak and inflamed eyes use Dr. Isaac Thompson's Eye-water. It is a carefully prepared physician's prescription.

THE largest single fortification in the world is Fort Monroe. It has already cost over $3,000,000.
