HOT SPRINGS, SOUTH DAKOTA.

What Hon. Samuel W. Allerton Thinks of Them.

(Hot Springs (S. D.) Star.)

The Hon. Samuel W. Allerton, the noted capitalist, of Chicago, arrived over the Burlington Route a few days since, and during an interview with a Star reporter said: "You people do not begin to realize what you have here in these waters. I have had the opportunity of traveling some over the United States, and have visited a great number of health resorts with springs which are claimed to have medicinal properties, but in my opinion you have water here that is superior to anything in this whole country, if not in the world, for the cure of rheumatic afflictions and diseases of the skin. My attention was first called to these springs by an intimate friend, Mr. Spencer, who owns a large cattle ranch west of here. He had a man on his ranch that was so badly afflicted with rheumatism that he was hauled here in a helpless condition. He was bathed in the old Indian bath for several weeks, and he went home entirely cured up, and I resolved that if ever I had rheumatism in my family I would try Hot Springs, S. D. We brought Mrs. Allerton here as soon as she was able to come at all, and I have found that all Mr. Spencer said in reference to the curative properties of the waters has been realized in my wife's case. She said she feels as though she had just been turned loose from a prison where she had been called upon to endure excruciating torture—every joint and muscle racked with pain so that life was a burden. No, I think Hot Springs' future is a grand one. Its air is pure and wholesome, its scenery lively and inspiring; sleep comes without any effort and it is just the place for rest and building up a shattered constitution. You do not talk enough about the value of your waters for skin troubles. I, myself, received great benefit from them last year in a short visit there. Your climate makes you infinitely superior to the Arkansas Hot Springs, and in a country where so many thousands are afflicted with rheumatism and other kindred ailments, if your advantages are made known, there is no question but that you will become the foremost health resort in the United States. We are delighted with our trip here and what your waters have done for us and will make frequent visits to your pleasant little city.

Preserving Tools from Rust.

Prof. Olmstead states that his method of preserving scientific apparatus from rust is one of the best known. His preparation is made by the slow melting together of six or eight parts of lard to one of resin, stirring until cool. This remains semi-fluid, ready for use, the resin preventing rancidity and supplying an air-tight film. Rubbed on a bright surface ever so thinly, it protects and preserves the polish effectually, and it can be wiped off nearly clean if ever desired, as from a knife-blade, or it may be thinned with coal oil or benzine.

Popular Route from Chicago to Milwaukee

Is the Chicago, Milwaukee & St. Paul Railway. Its double track between Chicago and Milwaukee has been completed, and with its block-signal system absolutely preventing accidents from collisions, trains may be run at the highest rate of speed attainable. The equipment of the line is perfect.

Trains leave Union passenger station, Canal and Adams streets, as per following schedule:

8:30 a. m. daily.
11:30 a. m. daily, except Sunday.
1:00 p. m. daily, except Sunday.
3:00 p. m. daily.
6:00 p. m. daily.
8:00 p. m. daily.
10:30 p. m. daily.

A Question of Fitness.

It used to be the tedium of the barber-shop that made boys averse to having their hair cut. Now it seems that other motives are at work.

Visitor—Why do you feel so worried about your son? He isn't wild, is he?

Mother—Oh, no: it isn't that. But look at the splendid head of hair he has. We can't decide whether to educate him for a pianist or a foot-ball player.—Washington Star.

Cranks Wanted.

To cranks the world owes its greatest reforms. There is one building and loan crank in every community, and we want to know him. Send your card to the National Building and Loan Herald, 136 Liberty street, New York, N. Y.

SACCHARIN has a rival. A new substance called valzin is now being manufactured in Berlin under a patent, and is claimed to be 200 times sweeter than sugar and free from certain objectionable properties of saccharin.

HALL'S CATARRH CURE is a liquid and is taken internally, and acts directly upon the blood and mucous surfaces of the system. Send for testimonials, free. Sold by Druggists, 75c. F. J. CHENEY & CO., Props., Toledo, O.

HE avoids many inconveniences who does not appear to notice them.—Seneca.

A Little Red Spot

Mr. Destiche.

Appeared on my left leg below the knee, and it gradually spread until I was covered with blotches and patches, which the physician called psoriasis, itching and burning terribly. Rev. Father Canteveel urged me to take Hood's Sarsaparilla. I did so with wonderful result. The large scales peeled off, the itching and burning subsided, and I am perfectly cured." THEO. DESTICHE, Green Bay, Wis.

Hood's Cures

Hood's Pills are the best after-dinner Pills, assist digestion, cure headache. Try a box.

HIGHLY ENDORSED.

The Professor of Physiological Chemistry at Yale College says: "*I find Kickapoo Indian Sagwa to be an extract of Roots, Barks and Herbs of Valuable Remedial Action, without any mineral or other harmful admixtures.*"

Kickapoo Indian Sagwa is the grandest Liver, Stomach, Blood and Nerve Remedy Known. Cleanses, Purifies, and Renovates every part of the human system. All Druggists, $1 a bottle—6 Bottles for $5.

S. N. U. 27

BEST POLISH IN THE WORLD.

RISING SUN STOVE POLISH

DO NOT BE DECEIVED with Pastes, Enamels, and Paints which stain the hands, injure the iron, and burn red. The Rising Sun Stove Polish is Brilliant, Odorless, and Durable. Each package contains six ounces; when moistened will make several boxes of Paste Polish.

HAS AN ANNUAL SALE OF 3,000 TONS.

THE FERRIS WHEEL.

IT IS THE LANDMARK AND NOVELTY OF THE FAIR.

Visitors Ask Their First Question When They See It from Afar—How It Is Made and What It Cost—Arrangements for Carrying Passengers.

Away Up in the Air.

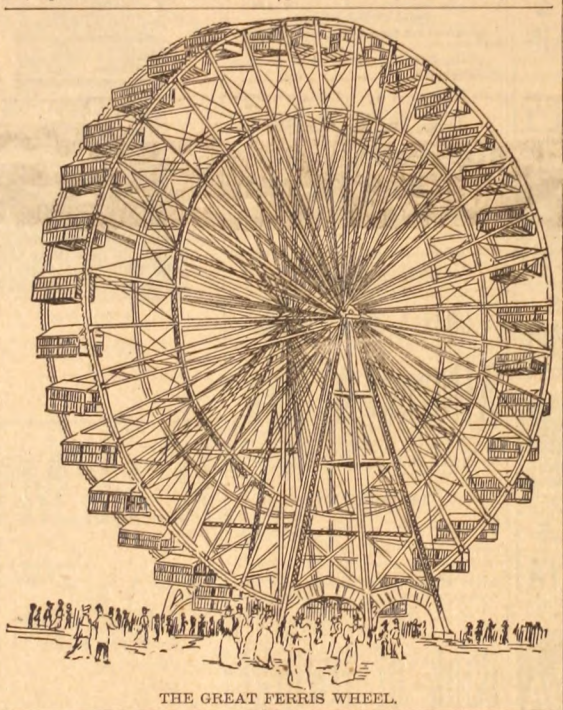
World's Fair correspondence:

"What on earth is that?"

This is the astonished inquiry that every passenger on the Illinois Central, the "L," and the steamboat lines on the lake makes as soon as he gets his first sight of the Ferris Wheel. And he asks it afar off, for the wheel is the landmark of the Fair.

His inquiry should be, "What in the air is that?" for if there is anything on or near the Exposition grounds besides the captive balloon that is not on earth it is the Ferris Wheel. At first it looks as the great trusses of the Manufactures Building used to look before the roof was on. But, as it towers higher and is seen to be circular instead of semi-circular, the spectator can form no idea what it is until he is told. It is beyond all question the crowning novelty of the Exposition as the Eiffel tower was of the Paris Exposition. To that it is superior in some respects, for it has the element of motion instead of being an inert mass, and presents engineering difficulties with which man never before grappled. When was made the first wheel similar to this in construction, in a general way, and for amusement purposes, no one knows. The idea is an old one. But the gigantic toy on the Midway Plaisance was born two years ago in the mind of George W. G. Ferris, a 36-year-old Pittsburg engineer.

The wheel is composed of two wheels of the same size connected and held together with rods and struts, which, however, do not approach closer than twenty feet to the periphery. Each wheel has for its outline a curved, hollow, square iron beam 25x19 inches.



THE GREAT FERRIS WHEEL.

At a distance of forty feet within this circle is another of a lighter beam. These beams are called crowns and are connected and held together by an elaborate trusswork. Within this smaller circle there are no beams, and at a distance there appears to be nothing. But at the center of the great wheel is an immense iron axle 32 inches thick and 45 feet in length. Each of the twin wheels, where the axle passes through it, is provided with a large iron hub 16 feet in diameter. Between these hubs and the inner "crowns" there are no connections except spoke-rods 2½ inches in diameter, arranged in pairs, 13 feet apart at the crown connection. At a distance they look like mere spider webs, and the wheel seems to be dangerously devoid of substantial support.

The explanation of this is that the Ferris wheel—at least inside the smaller crowns—is constituted on the principle of a bicycle wheel. The lower half is suspended from the axle

EGYPTIANS ROWING BEFORE THE TOMB OF THE SACRED OX.

by the spoke-rods running downward, and the upper half of the wheel is supported by the lower half. The only difference is that the Ferris wheel hangs by its axle, while a bicycle wheel rests on the ground, and the weight is applied downward on the axel.

The great wheel has thirty-six carriages for passengers hung on its periphery at equal intervals. Each car is twenty-seven feet long, thirteen feet wide, and nine feet high. It has a heavy frame of iron, but is covered externally with wood. It has a door, and five broad plate-glass windows on each side. It contains forty revolving chairs, made of wire and screwed to the floor. It weighs thirteen tons, and with its forty passengers will weigh three tons more. It is suspended to the periphery of the wheel by an iron axle six and one-half inches in diameter, which runs through the roof. It is provided with a conductor to open the doors, preserve order, and give information. All the cars together will carry 1,400 people. To avoid accidents from panics, and to prevent insane people from jumping out, the windows will be covered with an iron grating. It is probable that one car in six will be reserved for smokers.

The wheel, with its cars and passengers, weighs about 1,200 tons, and therefore needs something substantial to hold it up. Its axis is supported therefore on two skeleton iron towers, pyramidal in form, one at each end of it. They are 40x50 feet at the bottom, and 6 feet square at the top, and about 140 feet high, the sides next to the wheel being 40 feet and perpendicular, and the other sides slanting. Each

JAVANESE "MISSIGIT" OR CHURCH.

tower has four great feet, and each foot rests on an underground concrete foundation 20x20x20 feet. Cross-bars of steel are laid at the bottom of the concrete, and the feet of the tower are connected with and bolted to them with iron rods.

The wheel is never left to itself, but is always directly and constantly controlled by a steam engine. The wheel points east and west, and the engine, which is a 1,000 horse-power reversible Blooming train engine, is located under the east half of it, and sunk four feet in the ground. The machinery is very similar to that used in the power-houses of the cable car companies, and runs with the same hoarse roar that they do. It operates a north-and-south iron shaft, twelve inches in diameter, with great cog wheels at each end, by means of which the power is applied at each side of the wheel.

How to Get on Board.

It is arranged to empty and refill six cars with passengers at a time, so that there will be six stops in every revolution. Accordingly six railed platforms of varying heights have been provided on the north side of the wheel and six more, corresponding with these, on the south side of it. When the wheel stops each of the six lowest cars has a platform at each of its doors. The passengers step out of the south doors and other passengers step in at the north doors. Then the next six cars are served the same way, and the next and next all day.

FEATURES OF THE FAIR.

Miscellaneous Notes Picked Up at the World's Greatest Show.

In the Cape Colony exhibit are 40,000 rough diamonds.

The crown laces of Italy contain some specimens 1,800 years old.

The air brake is applied to 100 cars. Ten complete trains and a model depot are features of the Transportation Building.

It takes $12.75 to pay the bare cost of admission to attractions on the Midway Plaisance, the side show of the Fair.

In the Woman's Building a model kindergarten occupies a room 80 feet long by 60 feet wide.

Thirteen enormous logs from Canada contain 1,500 feet of lumber.

In the French collection there is a cabinet of bronze and ebony, with enamel of Limoges and Grecian figures. It has a secret spring and a labyrinth of drawers. The valuation is $20,000.

The valuation of $30,000 is given to two vases which the Spanish Commissioners keep under lock and key. These vases are of iron, four feet high; one Etruscan, the other Grecian, ornamented with gold hammered into the iron so as to show vines, cupids and figures of women in flowing drapery. A Spanish woman did this highly prized work. A few years ago she was a poor working girl.

Venice sends laces ranging in value from 2 cents to $400 a yard. Twenty years ago the famous old industry had about died out. There were only five women in Venice who preserved the secrets of making Venetian point lace. To-day 4,000 women in Venice make lace for one firm at 15 and 16 cents a day. In the Venetian lace house at the Fair is $40,000 worth of lace, with the veil patterned after that of Queen Maria Louisa at the head of the exhibit.

IN EVERY Receipt that calls for baking powder use the "Royal." It will make the food lighter, sweeter, of finer flavor, more digestible and wholesome.

"We recommend the Royal Baking Powder as superior to all others."—*United Cooks and Pastry Cooks' Association of the United States.*

NOTHING HIDDEN IN CHINA.

Everybody There Knows All About What Is Done by His Neighbors.

"In China a 'private house' is unknown. Any one can go anywhere, and if there is the least provocation he will do so." So said the Rev. A. H. Smith, after many years of missionary service in that country, to a writer for the Youth's Companion. To shut the door is a bad sign. "What is going on within that he does not admit his fellow-townsmen?" people are likely to say. There are no newspapers, no objects of general and human interest to attract attention, and as men and women must be interested in something, it is natural that they should be fond of neighborly gossip. From Mr. Smith's account of the matter, it is plain how very little Chinese and Yankees have in common.

Every Chinese has relatives beyond all count or remembrance. His wife has as many more. His married children add to the ever-widening circle. By the time he is 60 years of age a man is related to hundreds upon hundreds of individuals, each of whom is entirely conscious of the relationship, and does not forget or ignore it.

Not only do all the members of this army of relatives feel themselves entitled to know all the details of one's affairs, but the relatives—a swarm branching into infinity—will perhaps do the same. If a man is rich, or a magistrate, they certainly will do it.

One cannot make a business trip to sell watermelons, to buy mules, to collect a debt, of which every one will not speedily know all that is to be known. Chinese memories are treasure houses of everything relative to cash and to dates.

How much land each man owns, when it was acquired, when pawned, and when redeemed, how much was expended at the funeral of his mother, and the wedding of his son, how the daughter-in-law is liked at the village into which she was married, the amount of her dowry, what bargain was made with the firm that let the bridal chair, all these items and a thousand more everybody knows and never forgets.

Though two men at a fair may do their bargaining with their fingers concealed in their capacious sleeves, it will go hard if the neighbors do not discover the terms at last.

There are no secrets in China. Everybody crowds in everywhere—if not in sight, then "behind the arras." Every one reads every dispatch he can get at. He reads "private" letters in the same way.

"What!" he exclaims, "not let me see?"

No wonder the Chinese have an adage, "If you would not have it known that you do it do not do it."

Wave Tossed,

Sea sick voyagers suffer unspeakable tortures. Then if Hostetter's Stomach Bitters is resorted to the tortures cease. Yachting parties, ocean fishermen, nervous, sickly people, whom the jarring of a railway train affects much in the same way as the tossing of the surges do one who crosses the Atlantic for the first time, should be mindful of this and be provided with an adequate supply of the Bitters. This incomparable stomachic will promptly settle a stomach outrageously disturbed, is a capital antidote to malaria and nervous complaints, remedies constipation and biliousness, and counteracts a tendency to rheumatism. Besides this, it compensates for a loss of energy consequent upon undue exertion or nervous anxiety, and averts the effects of exposure in inclement weather and the wearing of damp clothing. Both appetite and sleep are promoted by it, and general health rapidly improves through its use.

Artificial Ice.

To make artificial ice it requires, it is said, one ton of coal to produce from five to ten tons of ice.

Playing Cards.

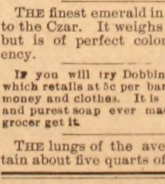
You can obtain a pack of best quality playing cards by sending fifteen cents in postage to P. S. EUSTIS, Gen'l Pass. Agent, C, R & Q. R. R., Chicago, Ill.

THE finest emerald in Europe belongs to the Czar. It weighs only 30 carats, but is of perfect color and transparency.

IF you will try Dobbins' Perfect Soap, which retails at 5c per bar, you will save money and clothes. It is by far the best and purest soap ever made. Have your grocer get it.

THE lungs of the average man contain about five quarts of air.

TO STOP THE PROGRESS of Consumption, you will find but one *guaranteed* remedy—Doctor Pierce's Golden Medical Discovery. In advanced cases, it brings comfort and relief; if you haven't delayed too long, it will certainly cure. It doesn't claim too much. It won't make new lungs—nothing can; but it will make diseased ones sound and healthy, when everything else has failed.



The scrofulous affection of the lungs that's caused Consumption, like every other form of Scrofula, and every blood-taint and disorder, yields to the "Discovery." It is the most effective blood-cleanser, strength-restorer, and flesh-builder that's known to medical science. In all Bronchial, Throat, and Lung Affections, if it ever fails to benefit or cure, you have your money back.

A perfect and permanent cure for your Catarrh—or $500 in cash. This is promised by the proprietors of Dr. Sage's Catarrh Remedy.

A Delightful Way to Be Entertained.

Realizing the fact that light literature is an almost necessary traveling companion, to those contemplating a "Summer Outing," or those who are desirous of visiting some of the many resorts and fishing grounds located along the line of the Wisconsin Central Lines, we take pleasure in advising our friends that we will send any one or all of the following valuable and interesting books to any address by mail "FREE" on receipt of 12 cents each, in stamps, to cover postage and packing.

These books are printed on good paper, well bound, the covers being illuminated in color. The entire list of ten books will be sent, prepaid, for $1.20 in stamps or otherwise. The amount asked is to cover charges and cost of packing.

2—*John Halifax, Gentleman.* By Miss Mulock.
5—*The Last Days of Pompeii.* By Bulwer Lytton.
6—*Scarlet Letter.* By Nathaniel Hawthorne.
10—*Tom Brown's School Days.* By Thomas Hughes.
15—*Dora Thorne.* By Bertha M. Clay.
16—*Very Hard Cash.* By Charles Reade.
21—*Tour of the World in 80 Days.* By Jules Verne.
23—*A Dream of Love.* By Emile Zola.
25—*Beyond Pardon.* By Bertha M. Clay.
27—*A Mad Love.* By Bertha M. Clay.

Preserve this card, mention the paper cut from, mark the books you wish, inclosing 12 cents for each book, or $1.20 for the entire list, and send with your address to

JAS. C. POND,
Gen'l Pass. and Tkt. Agent,
Wis. Cent. Lines, Chicago, Ill.

Mark your envelope "Advertising Department."

An Obliging Stranger.

Some friends were talking about impudence, audacity, and boldness. One told an incident that happened in an adjoining county two or three years ago.

A young man had purchased a bicycle—one of the high wheels then so common—and was on the outskirts of the town learning to ride it. It was nearly dark and a stranger came along.

"How do you get along?" asked the stranger.

"First rate," replied the young wheelman: "except that I can't mount very readily."

"Possibly I can show you how it should be done," politely ventured the stranger.

He did so, and mounted and dismounted several times, taking great pains to show the novice just how it should be done. Then he mounted again, after talking a minute or two about the beauty of the bicycle, and spun away down the road into the darkness. The young fellow never heard from him or the wheel again.—Utica Observer.

When Traveling.

Whether on pleasure bent, or business, take on every trip a bottle of Syrup of Figs, as it acts most pleasantly and effectually on the kidneys, liver and bowels, preventing fevers, headaches and other forms of sickness. For sale in 50c. and $1 bottles by all leading druggists. Manufactured by the California Fig Syrup Co. only.

A Long Line of Duffins.

At Skillington, a village in South Lincolnshire, England, there are now living Thomas Duffin, who was 96 in January; George Duffin, the son, aged 72; George Duffin, the grandson, aged 47; Joseph Duffin, the great-grandson, aged 25, and George Duffin, the great-great-grandson, aged 6. The head of the family is still active.

Delicate Mechanism.

The smallest holes pierced by modern machinery are 1-1,000th part of an inch in diameter. They are bored through sapphires, rubies and diamonds by a machine invented by one John Wennstrom, which makes 22,000 revolutions a minute.

THE progress of science in medicine has produced nothing better for human ills than the celebrated Beecham's Pills.

THE man who doesn't yell at a runaway team has missed a great opportunity.—Cleveland Plaindealer.

FOR weak and inflamed eyes use Dr. Isaac Thompson's Eye-water. It is a carefully prepared physician's prescription.

THE greatest depth of the ocean as far as sounded is 25,720 feet.

N. K. Brown's Essence Jamaica Ginger will cure diarrhœa. None better. Try it. 25 cents.

LADIES' FINE LOW CUT SUMMER SHOES such as you pay $2.00 for at retail, delivered at your Post-office, free, for $1.49. "German Syrup"

Regis Leblanc is a French Canadian store keeper at Notre Dame de Stanbridge, Quebec, Can., who was cured of a severe attack of Congestion of the Lungs by Boschee's German Syrup. He has sold many a bottle of German Syrup on his personal recommendation. If you drop him a line he'll give you the full facts of the case direct, as he did us, and that Boschee's German Syrup brought him through nicely. It always will. It is a good medicine and thorough in its work.

Princeton Hotel

Corner Sixty-third Street and Princeton Avenue (Englewood), Chicago. First-class beds, good table. Rates $2 per day. Electric cars to World's Fair Grounds; 10 minutes' ride. F. W. JONES, Proprietor.

DR. KILMER'S

SWAMP-ROOT

CURED ME

D. H. BILGER, Esq.
Hulmeville, Pa.

WHEN ALL ELSE FAILED!

La Grippe Baffled!

The After Effects Cured

Mr. Bilger writes: "I had a bad attack of the Grippe; after a time caught cold and had a second attack; it settled in my **kidneys** and **liver**, and Oh! such **pain** and **misery** in my **back** and **legs**.

The Physicians' medicine and other things that I used made no impression, and I continually grew worse until I was a physical wreck, and given up to die.

Father bought me a bottle of Dr. Kilmer's **SWAMP-ROOT**, and before I had used all of the second bottle I felt better, and to-day I am just as well as ever. A year has passed and not a trace of the Grippe is left. **SWAMP-ROOT saved my life.**"
