MISCELLANEOUS.

—The customs officials at Quebec and New York have discovered a huge consignment of goods, valued at \$1,000,000, the scheme having been in existence for some time. Cases of goods were shipped from England by a well-known firm of forwarding agents, and shortly after their departure from New York the customs officers there were notified that the cases were to be shipped to different parts of Canada. The goods forwarded from England would be kept in New York, while American goods of very little value would be shipped to Canada. Duplicate cases bearing the initials "P. S." with the name of the steamer by which they were forwarded and the other signs appearing on the original manifest, were to be shipped as the original goods to Canada. The goods were legitimate firms, and consequently never claimed. About forty of these cases are now in the warehouse in Quebec, addressed to G. Hartman & Co., Quebec, which firm has never been in existence. Meanwhile the valuable goods from Great Britain were opened up and presumably disposed of in the United States. FIRE AT DEADWOOD.

SOUTH DAKOTA TOWN SCORCHED.

Trouble Grows at the West Virginia Mines—Thirty-three in One Grave—Cheap Coal for Mexico—Obstreperous Convicts at Boston.

From Far and Near.

—Thirty-two buildings in a center of Deadwood, S. D., were destroyed by fire Wednesday morning, the loss being \$150,000 and the insurance \$125,000. The fire started in a cheap lodging-house, and it is supposed that one man perished in the structure. Within an hour all the buildings of Main street lying between Gold and Wall streets were a mass of flames. This part of the city was built exclusively of frame structures after the big fire of Sept. 26, 1873. The material used was native pitch, and of course was inflammable.
