 The circus bills have sneaked in on us again and once more does the small boy enjoy for naught a larger, grander circus than he will ever see inside the tent for twice the amount.

 The school boys from Gardner were here Thursday and did what they could in a game of base-ball. Braceville boys won. Score 36 to 10. All the Gardner school boys need is practise—and perhaps, some base ball players.

The Cleveland convention has closed and nothing has been accomplished. The outlook is as dark as ever. A wage scale was presented to the convention but was not considered. Illinois operators were not represented at the big meeting.
 Quite an interesting case was heard before squire Watkins last Monday. Fred Schultz sued Harry Smith for \$8, the amount which he says Smith agreed to pay for a stove. The stove has been used all winter in the terminal station of the B-S street railway. Mr. Smith said no price had been agreed upon and that the property was worth no more than \$9. The jury were then instructed to appraise, and decided that Mr. Schultz should have judgement for \$4.
 Dr. Warner brought suit against Wm. Norris last Tuesday for \$110.00 for medical services required by Mrs. Warner, as a result of injuries received some months ago from a dog belonging to Mr. Norris. It will be remembered that, early in February, Mrs. Warner's hand and arm were quite severely torn by the large grizzly dog belonging to Mr. Norris. Dr. Hansen was called and dressed the wound and within a few hours the dog was killed. Mrs. Warner has been unable to use her arm and the doctor says it will always be partially useless. The case was taken before Squire Coles, of Gardner and afterward changed twice and then thrown out. A large number of persons from here were present. The case will be watched with much interest and will be fought hard from both sides. The doctor is suing now for doctor's fees and will doubtless sue for damages later.

Non-pull-out

BOW (RING)

it is easy to steal or ring watches from the pocket. The thief gets the watch in one hand, the chain in the other and gives a short, quick jerk—the ring slips off the watch stem, and away goes the watch, leaving the victim only the chain.

This idea stopped that little game:

The bow has a groove on each end. A collar runs down inside the pendant (stem) and fits into the groove, firmly locking the bow to the pendant, so that it cannot be pulled or twisted off.
