Mr. E. Stiff, proprietor of the Centennial Hotel and Flour Mills, Dalley, Mich., tells the following story of his troubles and the relief afforded by Hood's Sarsaparilla: "Six months ago I was in very poor health. I had stomach and bowel trouble, dizzy spells, also very sick headaches, with aching and throbbing of chest and head. I was nearly deaf in the right ear. It seemed like a saw-mill running in my head. I used two and one-half bottles of Hood's Sarsaparilla, when I felt a change for the better. My hearing has been restored and all the other troubles have vanished, so I feel like a new man. I use Hood's Sarsaparilla on hand, also Hood's Pills." E. STIFF, Dalley, Michigan.

# Glacial Action.

It is said that glacial action has in places on the Union Pacific Railroad, moved the mountains down on the narrow right of way along the Columbia River; where the cliff rises often 100 feet above the track, leaving now hard a footing for the track.

Deafness Cannot Be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous lining of the Eustachian tube. When this tube is inflamed, you have a ringing sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and the hearing restored to its normal condition hearing will be destroyed forever. FEASANTS OF SASSOON. (These are types of the people who were massacred.) The country is now parceled out among the three nations—Turkey, Russia and Persia.

The Dead Dead to Dogs. Since the Turk has asserted his sway over part of Armenia, atrocities almost beyond belief have been committed. The sacking of a church, the desecration of an altar and the most fiendish treatment of women are every day affairs, and only attract the attention of the civilized world when, as now, great numbers of people are murdered.

Unparalelled Injustices Offered the Armenians by Cruel and Ferocious Kurds and Circassians—Land Where There's No Justice and No Law.

Cling to Their Faith. The recent horrible massacre of the Christians by the Turks in Armenia, Asia Minor, draws attention to that high-contrast picture of picturesque but most unhappy region of the earth.

Mr. Krimian, the head of the Armenian Church, bears the title of Catholicos. He resides at Etchmiadzin, a monastery near Erivan, and is the oldest monastic institution in the world. He

was previously Archbishop of Jerusalem, and has been Patriarch of Constantinople, but was banished from the Turkish capital and deprived of his rights as an Ottoman subject on account of his patriotic views. He was chosen Catholicos in 1892.

The Oldest People. The Armenians are the oldest people in the world and the earliest Christian nation. They trace their origin back to Haig, the grandson of Noah, who, 2,000 years before the Christian era, established a dynasty of sovereigns that continued to rule until Vah, the sixteenth in succession, fell in battle against Alexander the Great.

Though the Armenians are brave and seem to have all the elements of a military people, they have been held under subjection most of the time for 3,000 years. After being made at different times, away back in the dim past, part of the Assyrian, Median and Persian empires, Armenia fell under the Greek kings of Syria, about 200 B. C. Since then the land has been conquered or overrun in turn by Romans, Parthians, Saracens, Mongols, Russians, and, last and worst, Turks, who first established their supremacy nearly five hundred years ago.

the crops, merchandise, furniture, and even houses are coolly appropriated by the cruel, ferocious Kurds and Circassians, with the tacit sanction of corrupt Turkish officials. Armenian Christians are persecuted and driven out, while the Circassians and Kurds are armed and encouraged to hunt them. The Christian Armenians generally live in the valleys and cultivate the soil, while the Kurds and Circassians are nomadic people and live high up on the mountains where they tend their flocks. Whenever they desire they swoop down upon the valleys, gathering in the fruits of the peaceful Armenians' labors and carrying away flocks and herds.

There is no justice and no law for the Armenian. An Armenian is not allowed to testify against a Turk and the latter hardly ever thinks of carrying out any obligation he may owe the Armenian. The tax collectors travel in bands and swoop down upon the villages like harpies, collecting all that is possible to get without regard to rate or value. If the farmer has no money, off he goes to prison until he pays, and the prisons are now full to overflowing with unfortunate such as these.

And the shame of these awful outrages lies at the door of England which fails to carry out her obligations to protect Christians in Turkey.

## ASKS FOR MORE SHIPS.

Secretary Herbert in of the Opinion that the Navy Should Be Increased.

The most important recommendation made by Secretary Herbert in his annual report is that Congress authorize the construction of three great battle ships of about 10,000 tons displacement each, to cost, exclusive of armament, not exceeding \$4,000,000 each, and twelve torpedo boats of from 100 to 200 tons each, at the discretion of the Secretary, to cost not exceeding an average of \$170,000.

Since his last report five splendid ships have been added to the naval list, three of which are capable of speed in excess of twenty-one knots, while two of them are the fleetest cruisers in the world.

The five vessels are the Marblehead, 18,444 tons; Columbia, 22,880; Olympia, 21,300; Montgomery, 19,655; and Minneapolis, 23,076. One important change of naval policy is noted in connection with the Navy.

The advertisements for three new torpedo boats soon to be issued. The Secretary says that no speed premiums will be allowed on these boats; that the premium system undoubtedly had its advantages but is being abandoned.

The report shows the number of torpedo boats now on hand in foreign countries is 1,282, and the number building 182. Great Britain has 175 on hand and 61 building, while France is even better off with 214 on hand and 41 building.

Of seventeen countries enumerated not one has less than 22 of these boats, while the United States, with more coast and ports than any nation, has but six, counting those yet to be built.

On the point of preparation for war in time of peace the Secretary makes this very significant comment: "The latest developments of the arms race in all history is now being taught by China and Japan. A nation, the most populous in the world, able to put millions of fighting men into the field, is now, after suffering many disasters, securing Europe and America the most rapid lessons in the use of their numbers. Now it is buying discarded guns and discarded ammunition, whatever it can get, to aid in repelling the assaults of a people vastly inferior to it in numbers."

By calling attention to the urgent need of legislation for the relief of the personnel of the navy, the Secretary recommends that the enlisted force be increased by 2,000 men. In conclusion the Secretary submits estimates for the next year aggregating \$27,850,314, exceeding the current appropriation by \$5,495,193, caused mainly by the necessity of paying for vessels now under contract. It is stated that after this year the appropriations for the navy will rapidly diminish, falling from \$33,250,393 next year to \$750,000 in the following year.

Curious Industry in Paris. A Paris correspondent describes one of the oddest industries of that city to be found in a little shop in the Rue des Saussaies, which deals exclusively with the second-hand boots of the men who work in the sewers.

The Modern Mother. Has found that her little ones are improved more by the pleasant laxative, Syrup of Figs, when in need of the laxative effect of a gentle remedy, than by any other, and that it is more acceptable to the children, and, in fact, benefits them. The true remedy, Syrup of Figs, is manufactured by the California Fig Syrup Co. only.

Extinction of Great Game. The introduction of fire-arms—and especially of breech-loading fire-arms—and the rapid opening up of one great hunting ground after another, have wrought, within these last sixty years, such incredible havoc, says a writer in the Fortnightly, that great game is now rapidly approaching a period of extinction.

How to Produce More Economical and Healthful Articles for the Table. The official food analyses by the United States government, which have been studied with interest by the United States Government report gives the names of eighteen well-known baking powders, some of them advertising cream-of-tartar powders, which contain alum.

The report shows the Royal to be a pure cream-of-tartar baking powder, the highest in strength, evolving 100.6 cubic inches of leavening gas per single ounce of powder.

The Canadian government investigation was of a still larger number of powders. The Royal Baking Powder was here also shown the purest and highest in strength, containing forty-five per cent more leavening gas per ounce than the average of all the other cream-of-tartar powders.

These figures are very instructive to the practical housekeeper. They indicate that the Royal Baking Powder is the highest degree of purity—100 per cent—and that the Royal is one-tenth more economical. Still more important than this, however, they prove that this popular article has been brought to the highest degree of purity—100 per cent—and that the Royal is one-tenth more economical.

The powders of lower strength are found to have large amounts of impurities in the food. This fact is emphasized by the report of the Ohio State Food Commissioner, who, while finding the Royal practically pure, found no other powder to contain less than 10 per cent of inert or foreign matter.

The statistics show that there is used in the manufacture of the Royal Baking Powder more than half of all the cream-of-tartar consumed in the United States, with the exception of the wonderful sale thus indicated for the Royal Baking Powder—greater than that of all other baking powders combined—is a rather a rather striking evidence that the use of the Royal is the superiority of this article, and of its indispensability to modern cookery.
