There seems to be some trouble or misunderstanding between school directors and school treasurers in Livingston county, in regard to paying orders. It will be remembered that H. F. Foster, about a year ago, requested school directors to purchase a certain mathematical block outfit of one Prof. Curtis, formerly of Odell, Ill. This order undoubtedly pleased Mr. Curtis greatly, and it is said his pocketbook has waxed fat through Mr. Porter's request. We understand that the outfit is a good practical utensil to assist in imparting knowledge, but many of those who have looked into the matter claim that the cost is too much—that is the directors are paying about \$20 for the patent and \$8 for the block. It is also claimed by some that these and other purchases have been made by directors without holding regular meetings, and that the school treasurer is not obliged to honor an order signed unless it is ordered in a regular meeting. Be this as it may, and we are not posted as to the law, some of the orders are being contested. The contest should result in one thing sure, and that is that the directors should always give home dealers the preference upon all occasions where purchases are to be made. By dealing with people we know near home, we have some redress afterwards if everything is not all right, and also place the money so there is a chance to see some of it again sometime.
