ELECTRICITY

The Servant in the HOUSE

The average shop, or office or store is equipped in more or less degree with labor saving devices. It is if it's modern.

If the headpiece of the boss isn't solid bone, there's probably knowledge in it that these appliances add a snap to the working force. They subtract some of the strain.

There's a heap of inevitable and exhausting drudgery in the average American household. The stress that proceeds from it can be relieved just as strain is eased in the business establishment if the house is equipped for *Electric Service*.

Then you've only to press a button and a tireless, willing servant is ready instantly to tackle that back-breaking wash tub, or navigate that carpet sweeper, or run that sewing machine, or transfer that ironing from a stewing kitchen into another room or outdoors in summer.

And all this and other kinds of work will be done at a trifling cost. Electrical labor saving appliances are collectively a boon. They lengthen women's lives

If your house isn't equipped for electric light and power, you can have the job done by us at cost, with payments spread over two years, divided into monthly installments. The EXPENSE is small.
