DE LAVAL CREAM SEPARATORS

The World's Standard

Used Exclusively by 98% of World's Creameries

Ten years ago there were a dozen different makes of creamery or factory separators in use. To-day over 98 per cent of the world's creameries use De Laval separators exclusively.

When it comes to buying a separator why not profit by the experience of the creameryman, which qualifies him to advise you correctly.

He knows which separator will give you the best service and be the most economical for you to buy. That's why 98 per cent of the world's creameries use the De Laval exclusively.

There can be no better recommendation for the De Laval than the fact that the men who make the separation of milk a business use the De Laval to the practical exclusion of all other makes. They know from experience. **Easiest to turn, easiest to wash, skims the cleanest last the longest.**

SOONER OR LATER YOU WILL BUY A DE LAVAL

Poultry is uppermost in our mind when we buy turkeys, chickens, ducks and geese. The darky who steals chickens usually has to take what he can get as conditions are unfavorable for his close inspection, but

THE FULTON MARKET is never handicapped even on the question of price. When we see what we want, what we know our customers want, we buy, regardless of price. You receive the benefit, because our prices are as low and sometimes lower than those of our competitors.
