1912 Torpedo—\$1600 Complete

The price for either of three models—Touring, five-passenger—Torpedo, four-passenger, or Roadster, two-passenger—is \$1600. Not a cent more is needed to equip either car before it is ready for use, for top, Disco Self-Start, Demountable rims, BIG tires, windshield, large gas tank, magneto—dual ignition system—and all things usually listed as extras are included.

## Under Any Other Name You Must Wait Two Years

Three years hence you can probably get a car having features similar to those of the New Self-Starting HUDSON "33"—But Until then You Must Accept an Unsafe Investment—Nearly a Thousand More Parts, Cars that You Must Crank and Other Not Up-to-Date Features. UNLESS You Choose the New Self-Starting HUDSON "33."

On out-of-date cars, depreciation—naturally—is tremendous. Depreciation means actual loss of cash. Howard E. Coffin—acknowledged the world's greatest engineer—is the HUDSON'S Builder. Mr. Coffin built five famous cars—several of them, built years ago, sell today as leaders in their class. These cars when announced, astounded the automobile engineering world—they were so far ahead of contemporary cars.

His sixth and greatest car is three years in advance of others. That is why the safe investment is the

## New Self-Starting HUDSON "33"

Howard E. Coffin's latest car starts at the push of a button—as easily as ringing an electric bell. It starts from the seat—cranking need cause no more lame backs, sprains or broken bones.

It is the simplest, most effective self-starter known. For it weighs but 4½ pounds and has only 12 parts.

The New Self-Starting HUDSON "33" is surprising simple. It has power that will shoot it—with full load—up the steepest mountain roads through sand and mud and always with the sensation of flying that is utterly lacking in other cars.

The New Self-Starting HUDSON "33" is surprisingly simple—it has nearly a 1000 less parts than the average car. It is dust-proof—the motor, valves, transmission and all moving parts are enclosed so dust and dirt cannot get in.

Here are a few facts to consider: Demountable rims, which make tire changes the matter of a moment—BIG tires—accessibility that makes adjustments simple, thus saving cash—the simplest, most effective self-starter—high grade equipment—soft, easy riding qualities—a mechanism acknowledged by all to be the latest and cleanest in design—the high character of material and workmanship—a clutch so good that drivers never know they have a clutch.

You marvel at the value Howard E. Coffin has been able to put into his greatest creation. It ranks in the \$2,500 class of automobiles.

Haven't you at least a curiosity to see Howard E. Coffin's latest car?—the safe purchase. Today, while the subject is up, kindly come in and see the car. We will also give you a book of vital automobile facts and pictures of the car in several colors which will help you to choose. If you can't come in today, write.
