### RAILROAD NEWS

During first week of September the Alton earned \$299,998, a decrease of \$10,654 over the same week a year ago. Since July 1 the company has earned \$2,933,868, which is a falling off of \$102,139 over the same period in the fiscal year last year. During the final ten days of August the earnings made a notable spurt and the increase recorded reduced the decrease to \$84,000, the figure up to the middle of August being \$163,000. The September showing is not so favorable, the warm weather in the opening week being responsible.

The Alton management is displaying a liberal policy in respect to purchasing motor cars for section foremen and their men. It looks as if the day of the old time handcar, operated by muscular section men has gone. In its place has come the rapidly moving motor car, which will carry the foreman and his men without delay from point to point, saving much time and enabling the gangs to get considerably more work performed. These cars are now being supplied to foremen in the main line south of Bloomington and on the Air Line. The supervisors also get these cars and find them highly convenient.

Announcement is made of the appointment of a new superintendent of dining cars for the Chicago & Alton, Mr. Fred McIntosh being selected for his old position, succeeding W. E. Witty, resigned. The change is effective September 15. Mr. McIntosh resigned three years ago to take charge of a hotel at Dwight, and later went to the Great Northern as superintendent of dining cars. Mr. George J. Charlton, who is now the head of the Alton's passenger department, has been making an effort to secure the return of Mr. McIntosh and finally induced him to come back to his old post. He has always ranked as one of the best in the country in charge of the dining car service and the Alton management is glad to get him back in his former position. The return of Mr. McIntosh is another illustration of the fact that Mr. Charlton is once more the power in the Alton's passenger department and that he is gradually bringing back the former members of his staff.

Announcement was made at the general offices of the Alton Tuesday of the appointment of George H. Baker as fuel director, a newly created position. It will be the duty of Mr. Baker to take the necessary steps to reduce the consumption and waste of fuel. All officers and other employes are urged by President Worthington to co-operate with him for this purpose to the utmost of their ability. The consumption of coal upon the Alton is much in excess of what it should be and a large and immediate reduction is absolutely necessary. Mr. Baker is competent and ranks as an expert, having been engaged for many years as fireman and engineer. He was fireman on the western division of the Alton from 1879 to 1881, and later was with the Wabash as engineer for six years. He is now president of the Railway Educational Association of New York. He has devoted the past ten years to a study of fuel consumption and is an acknowledged authority. After looking over the Alton situation, he has become convinced that there is room for a notable saving in this item of expense. He has offered to look after the campaign in the effort to reduce coal consumption and does so voluntarily and entirely without compensation. His offer to assist the management was gratefully received and thankfully accepted and all are hopeful that the campaign will prove successful. Mr. Baker will take the necessary steps to organize his new department and will introduce a number of new ideas, calculated to effect a saving in coal.

Supplemental to the big order for shop machinery, placed early in the summer, the Alton management has just placed another one, aggregating \$25,000 and numbering twenty-five machines. The largest is a car wheel lathe which will cost \$8,000. It has been computed that close to forty per cent of the supplies turned out by the machines in the Bloomington shops are for outside points. It has been decided by President Worthington to install machines at Brighton Park, Dwight, Springfield, Venice, Roodhouse, Joliet, Slater and Kansas City, which will enable foremen in charge to turn out the supplies which at present must be secured in Bloomington and which tie up the machines there and prevent them from taking care of the local orders. The new machines will all come to Bloomington and will displace those long in service which will be set up at the smaller terminals outside. According to the present plans, Brighton Park will get two lathes, a stripper and a drill press. Joliet will get a drill press and two lathes. Dwight will get a boring machine and lathe. Venice will get a lathe and a drill press, Roodhouse a drill press, a shaper and rod press. Springfield will get a lathe
