Floating Baths Condemned.
Floating baths near great cities are now condemned by sanitary authorities. The vast quantities of sewage that are discharged into the waters that usually border such cities are thought to be productive of disease to bathers, and certainly render their ablutions of doubtful value as a cleansing agency.

Business Men.
Business men are divided into two classes—those who have machines and those who are.—Life.

The Easy Laxative

In justice to yourself you should try Rexall Orderlies,—your money back if you don't like them. They are a candy confection that really do give easy relief from constipation.

Good health is largely dependent upon the bowels. When they become sluggish the waste material that is thrown off by the system accumulates. This condition generates poisons which circulate throughout the body, tending to create coated tongue, bad breath, headache, dull brain action, nervousness, biliousness and other annoyances.

Avoid harsh cathartics and physics. They give but temporary relief. They often aggravate the real trouble. They are particularly bad for children, delicate or aged persons.

Rexall Orderlies

Come in tablet form, taste just like candy and are noted for their easy, soothing action upon the bowels. They don't purge, grip, cause nausea, looseness, nor the inconvenience attendant upon the use of purgatives. Their action is so pleasant that the taking of Rexall Orderlies almost becomes a desire instead of a duty.

Children like Rexall Orderlies. They are ideal for aged or delicate persons as well as for the most robust. They act toward relieving constipation, and also to overcome its cause and to make unnecessary the frequent use of laxatives. They serve to tone and strengthen the nerves and muscles of the bowels and associate organs or glands.

Make Us Proud It

We guarantee to refund every penny paid us for Rexall Orderlies if they do not give entire satisfaction. We make no promise and we in no way obligate you. Your mere word is sufficient for us to promptly and cheerfully refund the money.

Doesn't that prove that Rexall Orderlies must be right? You must know we would not dare make such a promise unless we were positively certain that Rexall Orderlies will do all we claim for them. There is no money risk attached to a trial of Rexall Orderlies, and in justice to yourself, you should not hesitate to test them.

Rexall Orderlies come in convenient vial-packet size tin boxes; 12 tablets, 10c.; 35 tablets, 25c.; 80 tablets, 50c.

CAUTION: Please bear in mind that Rexall Remedies are not sold by all druggists. You can buy Rexall Orderlies only at The Rexall Stores. You can buy Rexall Orderlies in this community only at our store:

SEYMOUR'S DRUG STORE

DWIGHT ILLINOIS

The Rexall Store

Absolutely Pure

Economizes Butter, Flour, Eggs; makes the food more appetizing and wholesome

The only Baking Powder made from Royal Grape Cream of Tartar

ALL GRIST FOR THE BRIDE

Other Women in the House Have Small Chance of Receiving Brides That Are Sent Home.

An uptown woman who nearly got stalled in a Ninth street car with a bundle of merchandise gave this reason for carrying home her own parcels, according to the Philadelphia Public Ledger.

"There is a prospective bride in our boarding-house," she said. "Everything in the dry-goods line is grist to the mill of the woman about to be married. Other women who have the misfortune to live in the same house suffer under difficulties. The only way they can insure the enjoyment of their own purchases is to carry them home.

"If the things are delivered the bride snaps them up. Possibly she has no real shopping propensities, but circumstances combine to make her a thief. Servants bring to her room all parcels of whatever size and shape that come to that front door. So many of the things do belong to her that to read the label or listen to what the delivery boy says is considered superfluous exertion. And the bride is equally disdainful of a preliminary examination. Ecologically she rips off wrappers and digs into contents.

"Yesterday I heard her raising the roof because a certain shop had sent her six pairs of black silk stockings, instead of the pink, blue and tan she had ordered. After she had sent the stockings back and had the money refunded I discovered the stockings were mine. I cannot afford to contribute these parcels to the bride's wardrobe, so I am carrying them home."

FOUND AN ECONOMICAL PAIR

Most Joyous Occasion of Life Failed to Make Them "Loosen Up," to Young Clergyman's Dismay.

A clergyman in Cherryvale tells Mrs. Moffett that when he was a struggling young preacher and a marriage fee looked like several square meals to him, he was called upon to officiate at the wedding of a wealthy young farmer to the daughter of another farmer, also very wealthy and widely known in the county. The night of the wedding was a stormy one and the train to the little country station was two hours late, so the preacher hired a rig and drove the entire 12 miles, getting there just in time to miss supper. The wedding was a brilliant affair and after the ceremony the groom called the minister aside and told him how much he appreciated his coming through the storm and handed him a \$2 bill—not enough to pay the team hire. As the preacher sat stunned, gazing at the money, the bride's father came in and the groom left. "How much did he give you?" asked the father. "Only two dollars," replied the preacher. "Why, that is a shame," exclaimed the father. "After all your trouble, too. He's terrible close with money. Don't say a word to any one, but take this." And as the old man slipped away the preacher, much touched, opened his hand and found a \$1 bill. —Kansas City Star.

VERONA

Miss Mary Fleming returned to Dwight Saturday.

Mrs. F. B. Young visited with Mrs. Gard Wednesday.

Mrs. A. P. Goodman is suffering with an attack of lumbago.

Earl McCann, of Ransom, spent Sunday with J. E. Marlette.

The house wipers are very busy getting the houses in shape for the lights next week.

Mr. and Mrs. George McCann, of Ransom, visited with J. E. Marlette and wife last week.

Mrs. Likens, of Mazon, visited with her sister, Mrs. J. W. Gard, Wednesday and Thursday.

Rev. E. S. Busby, of Sparland, called on his daughter, Beulah, Tuesday and Wednesday.

Miss Stella Seput, who has been working for Dennis Shannon, returned to her home in Streator Tuesday.

L. J. Reagan is in a very critical condition at this writing. Leslie Cody drove his route Wednesday.

F. B. Young and G. B. Kilmer went to Marengo Wednesday for the purpose of looking after their land interests.

John F. Stitt and George Marlette went to Chicago Monday, returning Tuesday evening with a new Regal car to be used for demonstrating.

INAUGURATION OF IRON AGE

Authorities Differ as to the Time and Place of Its First Introduction to the World.

Some authorities incline to the view that the iron age was inaugurated in Asia or in Africa. The investigations of recent years have pointed to the conclusion that it was not worked in Egypt until the ninth century before Christ, or in Libya until 450 B. C.; that the Semite adopted its use still later, and that it has been known in Uganda only within the last five or six centuries. There are Chinese records of date about four centuries before Christ that mention iron. Bronze weapons were employed in China until about 700 A. D.

It is thought that the metallurgy of iron must have originated in Central Europe, especially in Noricum, which approximately represented modern Austria and Bavaria. Only at Hallstett and in Bosnia and Transylvania, from which countries the Achans and Dorians are supposed to have migrated to Hellas, are found evidences of a gradual introduction of iron, at first as an ornament applied to the bronze which it ultimately replaced. Everywhere else iron was introduced in no gradual fashion, a fact that implies a foreign origin.

Meteorite iron was known in Egypt in remote antiquity, but no doubt it was worked as flints are worked, by cutting or chipping, and was not smelted. In other words, it was the metallurgy, not the knowledge of iron, that originated in Central Europe.

DOCTOR FEELS HIS HANDICAP

Recognizes Distinct Limitations When Called On to Cope With Modern "Scientific" Babe.

Because the doctor did not put on his seven-league boots and start the minute he heard there was a sick child in the neighborhood, the woman who had summoned him accused him of inhumanity. But the doctor protested that he was not inhuman.

"I am not anxious to respond," he said, "because the parents will not do anything I tell them to and will get a doctor more to their liking later in the day. How do I know? You as good as told me so yourself. You said the youngster was a scientifically reared baby; never knew a kiss or a cuddle or a germ or a tummyache until the present attack. Scientific babies are the despair of old-fashioned practitioners. The kinds of babies he is used to are those that depend mostly upon mothering to make them well. If an old-fashioned baby bumps his head or stubs his toe or mashes his thumb, just let mother kiss the bruise and it will stop hurting. Having been brought up on such nonsensical notions and believing in them still to a certain extent, there is no denying that in treating the new-style baby the old doctor is not a great success."

Concerning the Mole. Naturalists aver that among common animals few have been less studied in their life history than the mole. Accordingly a British scientist has turned his attention to the mole, with the result that some interesting data concerning this queer creature have been collected.

Under the edifice which the mole constructs above the surface of the ground will always be found a series of tunnels. A curious feature, almost invariably found, is a perpendicular run penetrating about a foot below the bottom of the nest and then turning upward to meet another run. A mole is never, one authority contends, found in his nest, although it may be yet warm from his body when opened. Guided by smell and hearing, a mole frequently locates the nest of a partridge or pheasant above his run and, penetrating it from below, eats the eggs. The adult mole is practically blind, but there are embryonic indications that the power of sight in the race has deteriorated.—Harper's Weekly.

Honesty Increasing. On her return from marketing, the young matron of the upper West side said to a caller: "I believe the sense of honesty is increasing in New York, at least in this locality. This morning I called the attention of a salesman to a small mistake he had made in giving me change, the mistake being in my favor. The proprietor, who was standing near, said to me: 'You're honest. You'll get along all right.' Not so many years ago the thought that seemed far too prevalent in this country was that only some clever form of dishonesty could 'get along all right.' The merchant who could trick a customer was supposed to be the smart fellow, and it was assumed an honest person was sure to get the little end of everything. I am delighted to find even one man who realizes that honesty is actually indispensable to success, and it is especially pleasing to find him in a place where I can deal with him regularly." —New York Press.
