Don't forget the bazaar at the Gleaner hall Saturday, Feb. 22, afternoon and evening. Supper will be served, and amusement furnished for everyone. Everybody invited. Receipts will be used for lights for the Church of God.

Why Silage Molds.

The following letter was written to Mr. Holmes in answer to an inquiry made by him to the College of Agriculture of the University of Illinois. The letter was written by Mr. R. S. Hulce, Supt. of feeding, and will prove of interest to the many users of silage in this vicinity.

January, 29, 1913.
Mr. J. H. Holmes,
Gardner, Illinois.

Dear Sir:—

Your inquiry concerning the molding of your silage is received. This trouble may be due to several things. It often happens that when the corn is put into the silo when too mature, not enough juice is present to allow the silage to pack well. Again, if the silage is not well tramped in the silo at the time of filling, molding may take place due to the contact of the air with the silage. We have found that running water into the silo at the time of filling helps to improve the keeping quality of the silage, where there is a tendency for the fodder to be in a dry condition. One is almost forced to learn these things by experience; such as the proper stage of maturity to cut the fodder in order to get the best grade of silage. A good time to cut for silage seems to be when the ears are glazing and the bottom leaves have commenced to turn. Cutting fodder too green causes a very sour silage and besides, the amount of nutriment present is not as great as if cut when the ears are in the glazing stage.

Very truly yours,
R. S. HULCE.

Surprise Your Friends.

For four weeks regularly use Dr. King's New Life Pills. They stimulate the liver, improve digestion, remove blood impurities, pimples and eruptions disappear from your face and body and you feel better. Begin at once. Buy at O'Malley's Drug Store.—Adv.

SCHOOL NEWS

Melville Amos has gone away for a few weeks.

The third grade are busy this week studying the Life of Washington.

The sixth grade class in history are studying the story of Daniel Boone.

Ralph Boyer is absent from the eighth grade this week on account of sickness.

Jennie Chandler entered the third grade and her brother the fifth grade this week.

Washington has been the main subject of Language work this week in the first grade.

Orville Trentham left the third grade Monday and will attend school in the country.

The first grade children made a new border for their blackboard, of five children playing soldier.

The sixth grade is learning "The Legend of the Crossbill," from the German, translated by Longfellow.

The second room has placed a Washington monument on their sand table. This is a copy of the one on the Potomac river.

Milton Worby and Edna Trentham left the sixth grade on Tuesday of this week, both of the families having moved away from Dwight.

The play work this week in the first grade consisted in making horses. There were some very good ones and some queer looking specimens.

The February booklets designed by the sixth graders are very good. They are on exhibition on the bulletin boards in the lower hall this week.

The second room made some excellent flag holders of clay. The children are producing very smooth and well finished pieces in their clay modeling.

The second room entertained the first room with a little Washington party. Soldier caps adorned with paper flags made by the children, and badges, were made for the little visitors. Popcorn was served in little blue boxes, decorated in white stars and tied with red cord. Apples were also served. Each child was given a flag so they could play soldier in marching through the hall and the two rooms.

West Side Notes.

Mr. Lyons visited the first grade one half day Monday.

The first and second grades are to have a program Friday.

Mrs. Chris Jensen visited the second grade Friday, Feb. 14.

The following is a story on Lincoln's Home by Maurice Nelson, a second grader:

The second grade have been writing some very good stories on Washington in Language work.

"The Flag Goes By," and "Hurrah for the Flag!" are being learned by the second graders.

In the work in measurement in the second grade, this week, they made flags and colored them.

The first grade made some very good Washington posters. They represent Washington on horseback.

Comparative Digestibility of Food

Made with different Baking Powders

From a Series of Elaborate Chemical Tests:

An equal quantity of bread (biscuit) was made with each of three different kinds of baking powder—cream of tartar, phosphate, and alum—and submitted separately to the action of the digestive fluid, each for the same length of time.

The relative percentage of the food digested is shown as follows:

Bread made with Royal Cream of Tartar Powder:

100 Per Cent. Digested

Bread made with phosphate powder:

68 3/4 Per Cent. Digested

Bread made with alum powder:

67 3/4 Per Cent. Digested

These tests, which are absolutely reliable and unprejudiced, make plain a fact of great importance to everyone: Food raised with Royal, a cream of tartar Baking Powder, is shown to be entirely digestible, while the alum and phosphate powders are found to largely retard the digestion of the food made from them.

Undigested food is not only wasted food, but it is the source of very many bodily ailments.

The first graders are committing a short poem, "Golden Keys." They expect to put it in practice in their daily work.

The first graders are making a Book of Rules of Conduct. The cover has on it a picture of Washington, mounted on a background of a hatchet.

Mr. Lincoln was the bravest hero we ever knew. Lincoln was born in a log cabin and they hung bear skins over the doors and windows to keep out the rain and snow. In this log cabin there was a table, a few stools and a bed of leaves.

The Physics class have begun experiments on light.

The girls basketball team will play Chenoa, at Chenoa, next Friday evening, Feb. 28.

The Biology class is working on the fresh water mussel or clam, in their laboratory work.

Gertrude Diefenbach and Agnes

Korsgaard took the Grundy County teachers' examination at Morris last Saturday (Feb. 15). They were the only two out of the whole number which included girls from Streator High, Morris High, etc., who passed arithmetic. Their averages were, Gertrude, 91 1-10; Agnes, 89 7-10.

The following program will be a joint program presented Wednesday afternoon, Feb. 26:

1. America.....High School Chorus
2. What Patriotism Means.....Grace Hills
3. Oration, George Washington.....Dorothy Baker
4. The Truth About the Cherry Tree.....Edward Dickler and Ed Holzhauser
5. Music.....High School Chorus
6. Oration, Alexander Hamilton.....Ray Dougherty
7. Dialogue, Tallyrand and Benedict Arnold.....
8. Piano Solo.....Edith Short
9. Our Next President.....Florence Christman
10. George Washington's Namesake.....Ruth Brendly
