SANITARY PLUMBING and HEATING

The fact that a man can put a thread on a piece of pipe and couple it up with a wrench does not make that man a SANITARY PLUMBER, any more than the fact that a man can write with a pen makes him an expert bookkeeper. It takes years of study to become a SANITARY PLUMBER.

It is about time that the people of Dwight realized the meaning of "Sanitary Plumbing" and Heating.

I am an acknowledged expert in my line and this is what you want to consider when giving out your work this coming season.

The cheap job by inexperienced workmen means that in a year or two the cost of that job will be double the cost of a first class job installed by a first class man who knows what real Sanitary Plumbing and Heating is.

I stand back of every job of plumbing and heating I install, and I have the knowledge to install each job in a sanitary manner. I am no stranger in the town; my work here for the last 10 years speaks for itself.

The cost of my work is always at the lowest figure for good work. My motto is "Low Cost, High Quality."

I am also a State Licensed Plumber.

Local automobile dealers are looking for 1914 models in the near future. It is somewhat early to spring next year's cars, but that seems to be part of the game. A number of concerns this year will put their new cars on the market at about the same time. They are all trying to be first as the early bird catches the worm. Just what change there will be in the 1914 cars is not known. There will probably be more six cylinder cars than ever on the market. Changes in body lines and designs will also be numerous, but there will be very few radical changes on cars. Wire wheels will also play an important part in the 1914 models.
