There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & Co., Toledo, O. Sold by Druggists, price 75c. Take Hall's Family Pills for constipation.

## TREES LIVE FOR CENTURIES

Six Thousand Years is the Age of One on the Canary Islands, and There Are Numerous Others.

Knowing that some trees have reached the age of several thousand years, it is surprising that so many of our shade trees should die so young. The age of a dragon tree on one of the Canary Islands is said to be more than 6,000 years; that of a bald cypress in Mexico is believed to be more than 4,000 years, and that of an English oak in Europe and a "big tree" (Sequoia gigantea) in California is known to be more than 2,000 years.

Many trees also have attained to enormous size, both in height and diameter. The eucalyptus in Australia is known to reach a height of 470 feet and the "big tree," the redwood, and the Douglas fir in California often grow to a height of three hundred feet. The sycamore and tulip tree in the eastern states sometimes reach a height of 150 feet. The tree of largest diameter is found at the base of Mount Etna, in Sicily. It is a species of chestnut and its trunk is more than sixty feet in diameter. Some people claim this remarkable tree is the result of several individuals. The Oriental sycamore comes next with a diameter of about forty feet.—From "Trees in Winter" by Blakeslee and Jarvis.

Real Uniformity. Colonel G— is a fine commander, but not a musician. He sent for the chief musician of his regimental band one day and delivered this scathing criticism:

"I notice a lack of uniformity about the band which must be regulated. Yesterday morning they were out on parade, and the largest man in the band was playing a little bit of an instrument—fute or something of the kind—and you had the big drum played by a small man. That sort of thing doesn't look well, and must be attended to. I want the small men to play small instruments, and the big men the big instruments. And another thing—I want the trombone players to slide their instruments in and out in unison. It annoys me to see them all out of step with their hands."—Everybody's Magazine.

Enormous Wealth of the Borgias. A large proportion of the wealth of the Borgias appears to have come down to their descendant, the duke of Osuna, who figures in Disraeli's letters. In 1867 the duke was appointed Spanish ambassador at St. Petersburg.

He accepted the post on condition that the government would distribute his salary among the poor of Madrid, as he could not condescend to draw money from the state. The duke was then described as "the wealthiest man in Europe." His property extends from Cadiz to Turin. He could travel by coach from Madrid through France and Germany to Warsaw and sleep every night in one of his own castles.

English Pronunciation. When Mrs. Newlywed had completed her marketing in the Ridge avenue market the other day the butter-and-egg man said to her: "But you have forgotten your razor."

"Razor," said Mrs. Newlywed, wondering if the man was trying to make fun of her. "What do you mean?"

"Why, your bread raiser; your yeast cake," was the reply.
