**Bid Your Children of Worms.**

You can change fretful, ill-tempered children into healthy, happy youngsters, by ridding them of worms. Tossing, rolling, grinding of teeth, crying out while asleep, accompanied with intense thirst, pains in the stomach and bowels, feverishness and bad breath, are symptoms that indicate worms. Kickapoo Worm Killer, a pleasant candy lozenge, expels the worms, regulates the bowels, restores your children to health and happiness. Mrs. J. A. Brislin, of Elgin, Ill., says: "I have used Kickapoo Worm Killer for years, and entirely rid my children of worms. I would not be without it." Guaranteed. All druggists, or by mail, Price 25c. The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have no much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

The state Epworth League at Havana is holding a week's session. The session this year, as heretofore, is being held at the Chautauqua grounds two miles north of town.

A fellow who had been criticised by a newspaper went to a lawyer and asked him how he could break up the newspaper. The lawyer told him to go buy it and run it for six months.

Judge Russell has made one of the best superintendents the Pontiac Reformatory ever had, and retires with the good will of all. Its a shame that such offices must be controlled by politicians.

Fourteen heavily loaded cars, eleven filled with coal and three with stone went into the ditch at Grant Park on the C. & E. L., when north bound extra 710, in charge of Conductor Stoner, struck a broken rail.

Lester Allen, of Odell, won the 100 mile motorcycle race at Indianapolis last week in the remarkable time of ninety-eight minutes and fifty one seconds, which clips the Indiana state record by six minutes.

Harold A. Shaw, 20 years old, of Urbana, was murdered in cold blood by a man supposed to be named Penman, because he coveted Shaw's yellow racing car. The Shaw family are prominent and wealthy.

Attorney Harry M. McCaskrin, of Rock Island, has asked the Board of Review to appoint him special attorney to collect taxes of the M. W. A. there, claiming that over eleven million belonging to the order is taxable. Its a question, but it seems the M. W. A. officials are right.

Workmen employed in the excavating for the new Peru hospital are making some gretsome finds on the site at the corner of Sixth and West street. Almost hourly they uncover the remains of some unknown person, interred years ago, whose grave was unmarked and not known to be in the burying plot.

The newly organized state game and fish conservation commission has begun its work by the division of the state of Illinois into six districts. In each district there will be one district warden and ten deputy wardens. The district headquarters will be at Chicago, Sterling, Havana, Shelbyville, East St. Louis and Mt. Vernon.

Henry Johnson, who resides on a farm two miles southeast of Neponset has a rather peculiar barometer which, however, is very reliable. He has a carpet on one of rooms of his home which in dry weather remains perfectly smooth. When there is to be rain the carpet starts to wrinkle up. Recently it wrinkled and the next night the rain came.

Little Marjiam Moore, of Bloomington, aged four years, fell from a second story window of a building at the corner of Center and Locust streets and miraculously escaped uninjured. She fell a distance of about 18 feet, but it is presumed a window screen which went out with her alighted in such a way on the ground that her fall was broken and this allowed her to escape with barely a scratch.

Warden E. M. Allen, of Joliet, and the members of the prison board have gone to Colorado, to study the methods employed by the Colorado prison officials in handling the convicts employed on road work. The trip is made necessary because of the action of the state highway commission deciding to employ convicts in building a strip of roadway in Lee and Ogle counties. The party expects to be gone several days.

The Pekin commissioners signed a contract with the Central Illinois Light Company for a two year term for the lighting of the city. The arc lamps of 2,000 candle power are to be furnished at \$65 per annum, the same as in previous years; the thirty-two candle power are at \$12 per year. The company is to equip the bridge draw with a motor, install and equip same free of charge, and it is to become the property of the city when completed. The schedule is to be all night and every night. Heretofore the moon-

light was in vogue. Free light is furnished to all departments of the city hall.

Illinois has not been deprived of the distinction of being the largest producer of internal revenue of any of the states of the union. The report of the commissioner of internal revenue just made public, shows that not only is the state the leader in this respect, but the fifth Illinois, or Peoria district, is the largest internal revenue producer of any district, the aggregate collections last year being \$34,000,994. The first Illinois district, Samuel M. Fitch, collector, produced \$13,135,972; the eighth district where Frank L. Smith was collector and where Herbert F. Adams is now acting, \$10,533,030, and the thirteenth Illinois district, Walter S. London, collector, \$642,604. The seventh Indiana district was the second largest collection district in the country, with \$20,720,666, and the sixth Indiana district showed \$10,902,839. The total receipts from the state of Illinois were \$58,602,601; Indiana, \$31,623,505; Iowa, \$1,180,855; Michigan, \$8,302,016, and Wisconsin, \$9,564,192.

**Curious History of United States Territory That "Overlaps" Into the Dominion of Canada.**

How did the United States come to get that small corner of land which juts out from the extreme northern boundary of Minnesota? History of that little "nose" which sticks out into Canada from Minnesota and which constitutes the northernmost point of the United States is very interesting. Under the treaty of 1783 boundary between the United States and British possessions was fixed. A certain point on the Lake of the Woods was mutually agreed to as one starting point, this being considered the headwaters of the St. Lawrence river and Great Lakes system. At that time it was not known whether this point was north or south of the forty-ninth parallel, but it was known to be close to it. The understanding was that from that point the boundary should go north or south to the forty-ninth parallel, as the case might be. Later and more accurate surveys showed that point was about 25 miles north of the forty-ninth parallel, and so at this place the boundary makes a jog above that line. Uncle Sam thus has a little piece of territory of about 100 square miles in extent north of the general boundary. And the joke of it is that any one has to go by water in order to reach this little piece of territory unless he wants to go through Canada.—The Pathfinder.

**OLD FORT BUILT BY RUSSIANS**

Archaeologist's Explanation of Ruins of Building on the Northern Coast of California.

Ruins of buildings on the old Weske ranch, near Windsor and about thirteen miles north of Santa Rosa, Cal., hitherto unexplained, now are thought to be the work of people of mechanical skill, probably Russians, who erected the buildings 100 years or more ago.

That the edifices were not the work of the Spaniards is taken for granted, as the history of this country under Spanish rule is sufficiently complete to give assurance that some record of the construction of the buildings would have been left.

The construction is too exact to have been the work of the Indian races and local investigators have decided that the ruins are those of a large fort or fortified settlement built by Russians early in the last century.

The ruins have the appearance of being parts of a once massive fortification. In one place there stands a part of the wall, twenty feet in height, thirty feet long, thirty feet thick at the ground and tapering to a width of ten feet. It is built of basalt slabs about twenty feet in length and irregular prismatic shape.

Russians under Admiral Kuskoff, Admiral Kotzebue and Count Razan off made a determined effort to establish themselves along the northern coast more than 100 years ago.

**Alone Twenty-Four Years.**

It was stated at an inquest on a woman at Newington, England, recently that she had been a tenant of Pousobly buildings, Blackfriars, for 24 years, and the porter said he had never known her to have a visitor. Her sister happened to call, and at her request he burst the door open and found the woman dead. Further evidence showed that the cause of death was bronchitis, and that the woman had been dead for two days.

The ruins have the appearance of being parts of a once massive fortification. In one place there stands a part of the wall, twenty feet in height, thirty feet long, thirty feet thick at the ground and tapering to a width of ten feet. It is built of basalt slabs about twenty feet in length and irregular prismatic shape.

Russians under Admiral Kuskoff, Admiral Kotzebue and Count Razan off made a determined effort to establish themselves along the northern coast more than 100 years ago.

**Mothers Ent.**

Father always sets that it is mother's birthday until she bawls him out about it after breakfast. Then he goes downtown and sends her home a screen door for the kitchen or a rubber mat for the bathroom as a present.—Cincinnati Enquirer.

**HARD.**

It is hard for a man to look dignified while standing upon his tiptoes to whisper into the ear of his sixteen-year-old son.

**Alone Twenty-Four Years.**

It was stated at an inquest on a woman at Newington, England, recently that she had been a tenant of Pousobly buildings, Blackfriars, for 24 years, and the porter said he had never known her to have a visitor. Her sister happened to call, and at her request he burst the door open and found the woman dead. Further evidence showed that the cause of death was bronchitis, and that the woman had been dead for two days.

**Curious History of United States Territory That "Overlaps" Into the Dominion of Canada.**

How did the United States come to get that small corner of land which juts out from the extreme northern boundary of Minnesota? History of that little "nose" which sticks out into Canada from Minnesota and which constitutes the northernmost point of the United States is very interesting. Under the treaty of 1783 boundary between the United States and British possessions was fixed. A certain point on the Lake of the Woods was mutually agreed to as one starting point, this being considered the headwaters of the St. Lawrence river and Great Lakes system. At that time it was not known whether this point was north or south of the forty-ninth parallel, but it was known to be close to it. The understanding was that from that point the boundary should go north or south to the forty-ninth parallel, as the case might be. Later and more accurate surveys showed that point was about 25 miles north of the forty-ninth parallel, and so at this place the boundary makes a jog above that line. Uncle Sam thus has a little piece of territory of about 100 square miles in extent north of the general boundary. And the joke of it is that any one has to go by water in order to reach this little piece of territory unless he wants to go through Canada.—The Pathfinder.

**OLD FORT BUILT BY RUSSIANS**

Archaeologist's Explanation of Ruins of Building on the Northern Coast of California.

Ruins of buildings on the old Weske ranch, near Windsor and about thirteen miles north of Santa Rosa, Cal., hitherto unexplained, now are thought to be the work of people of mechanical skill, probably Russians, who erected the buildings 100 years or more ago.

That the edifices were not the work of the Spaniards is taken for granted, as the history of this country under Spanish rule is sufficiently complete to give assurance that some record of the construction of the buildings would have been left.

The construction is too exact to have been the work of the Indian races and local investigators have decided that the ruins are those of a large fort or fortified settlement built by Russians early in the last century.

The ruins have the appearance of being parts of a once massive fortification. In one place there stands a part of the wall, twenty feet in height, thirty feet long, thirty feet thick at the ground and tapering to a width of ten feet. It is built of basalt slabs about twenty feet in length and irregular prismatic shape.
