Must Suit You

You will never know the meaning of real engine economy and efficiency until you study the quiet, smooth, easy running features of

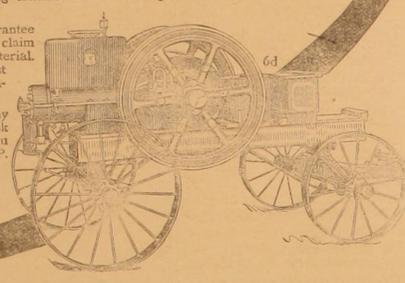

Lauson Frost King Gasoline and Oil Engines

There are more drop forged and case hardened parts on Lauson Frost King engines than any other. This means an engine as accurate in adjustment, and therefore as economical, after five years' use, as when new. The Lauson Frost King is built up to a standard, not down to a price. They cost a little more than some others to start with, but a great deal less in the long run. The Frost King trade-mark on an engine is a warranty of long, satisfactory service.

Guaranteed—The manufacturers absolutely guarantee Lauson Frost King engines to make good on every claim they make for them; also as to workmanship and material. And our guarantee stands back of them, too. The "Frost King" is so dependable we have no hesitation in recommending it to everyone.

Come in and see the "Frost King"—learn why so many up-to-date farmers think it's the best engine on earth. Ask about Lauson Service to users, too. We can supply you with any style or size "Frost King" from 2 to 50 H. P.

SCHOOL NEWS

The Dwight schools opened Tuesday with a very good enrollment. The enrollment by grades is as follows:

EAST SIDE.	
First Grade	23
Second Grade	23
Third Grade	53
Fourth Grade	46
Fifth Grade	40
Sixth Grade	30
Seventh Grade	32
Eighth Grade	30
WEST SIDE.	
First Grade	32
Second Grade	31
High School	75

The new departments of Manual Training and Domestic Science are both full. There are eighteen boys in the High School in the Manual Training and sixteen High School girls in the Domestic Science course.

The Seventh grade has Manual Training and Domestic Science on Monday and Wednesday afternoons from 2:35 to 3:50. In these courses there are fourteen boys and eighteen girls. The Eighth grade has its work Tuesdays and Thursdays. In these classes are twenty girls and fourteen boys.

RAILROAD NEWS

The intense heat of Tuesday caused one of the main tracks of the Alton through Cayuga to buckle so that it was impossible to run trains over it. Section gangs were rushed to the scene and the damaged rails replaced by others.

The Alton has a gang of linemen working out of Pontiac engaged in stringing copper wires to be used by the telephone system for operating trains, which is soon to supplant the old style telegraph instrument. The new system is expected to be in working order in a short while. This system is being used for the operation of trains on the southern and western divisions of the road.

A large steel cabinet containing lockers, having automatic key locks, has been installed in the waiting room at the Alton station here. By dropping a dime in a slot a person is given the use of one of the lockers in which to leave his baggage and at the same time a key is released for the use of the person using the locker that they may lock the door and thus safeguard their grips and packages.

The Alton has supplied its baggage man, Mr. J. P. McKee, at the station in this city, with a standard measuring stick graduated up to seventy-two inches. This stick will be used by him on and after Sept. 15 for measuring all baggage brought to him for checking. The standard size for a trunk is forty-five inches each dimension. All trunks over that will be assessed so much excess per inch besides the usual excess for weight. This is in accordance with a new interstate commerce ruling.

MONEY GROWS

Your Money Should Work

for you as hard as you work for it. The question is—how to make it work. The best way, in fact about the only safe way is to

INVEST IT JUDICIOUSLY IN LAND

in Illinois and Iowa. The land will produce crops which can be exchanged for gold and every year it will be increasing in value. Your money invested here will surely grow. You and NOT your banker will reap the harvest.
