

Hoosier Kitchen Cabinets

10 PER CENT BIGGER AND PRICED LOWER.

This year every Hoosier is made 2400 cubic inches bigger,—in the face of a steady advance in cost of materials, we've added cupboard space and many tested conveniences entirely new in a kitchen cabinet. Finally we've lowered prices so you can buy a full extension Hoosier having all these extras at a much lower price than ever before.

WE KNOW

This is by far the best line of Hoosier cabinets we've ever built.

WE GUARANTEE

To every person who buys a Hoosier cabinet that it is scientifically convenient and durably built by careful, experienced workmen. If it is not exactly as we describe it, the purchaser may return it within thirty days and receive back in full the money paid for it.

WHO USE HOOSIER CABINETS?

700,000 AMERICAN WOMEN have placed their stamp of approval on our cabinet by installing them in their kitchens.

THE LONDON DAILY NEWS

Recognized the Hoosier cabinet by describing in its columns an up-to-date kitchen as a kitchen that has been "Hoosiered."

THE EXCLUSIVE AGENCY

For the Hoosier Cabinet Line for 1914 has been placed with C. M. Baker & Son who are very anxious that every lady in Dwight and vicinity whether interested in the purchase of a kitchen cabinet or not, to call at The Furniture Store and thoroughly inspect the 1914 Hoosier cabinets. We solicit the privilege of showing the line to you. The new Hoosiers will be on display next week. Watch our window for display.

"The Hoosier is a wonderful value."

Economical Production is Essential in Successful Manufacturing, but it's Realization Demands the Conditions for it

If any plant large or small is fitted with steam driven machinery, its operating expense figures out one of the largest items in the general cost sheet. It throws away power at many places between the engine and the tool. Follows then that a form of energy that delivers its maximum at the point wanted, writes this item in lower figures. You have that in

Electric Power

There's no waste about it. It responds with just the power required—no more, no less. If it had no other distinction this would be enough to place it in a class alone. But this is only one of its numerous features of superiority and the manifestation of all is as marked in a small shop as a big one.

If you operate any kind of machinery let us talk to you about Electric Power.
