DWIGHT "Marco Grocer" ILLINOIS

20 Reasons for Buying a 1915 Chalmers "Light Six" Now

Master "Light Six" \$1800. Fully Equipped--f. o. b. Detroit

- 1.—It is a manufactured—not an assembled car.—Built complete in the Chalmers shops by Chalmers trained workmen under rigid Chalmers inspection.
- 2.—Supremely good looking.—Streamline body, clean running boards, oval fenders, fine finish and attractive color. Pronounced by experts "the best looking car on the market."
- 3.—Easy riding.—Long wheelbase—126 inches. Long flexible springs; main leaf of Vanadium steel. Rear springs underslung.
- 4.—Medium weight.—Lighter than most yours selling at the same or greater price; heavier than any of the so-called "light sixes." Scientifically tested for a four-fold margin of safety, yet light enough to be economical; no flimsiness—no unnecessary weight.
- 5.—Roadability.—Weight perfectly distributed, hence no tire destroying sideway. Concentric torque tube and perfect spring suspension make car hold well to any road.
- 6.—Non-stallable motor.—Chalmers-Entz electric starter won't let motor stop. Greatest element of motor safety ever introduced. Makes car safe and easy as an electric for a woman to drive.
- 7.—Convenience.—Left hand drive, center control, entrance or exit from either side of car. Starter and ignition switch, electric light control, carburetor adjustment, gasoline and oil gauges, speedometer, on cowl board of dash. Motor and all lubrication points accessible.
- 8.—Big power; small motor.—Chalmers built. Even the castings made in Chalmers foundries. Small bore, extra long stroke (3 1/2" bore by 5 1/2" stroke) develops unusual power. Very large Tungsten steel valves. Will not warp or pit, so no power is wasted. T-head design gives the smoothness of the turbine—the flexibility of steam.
- 9.—Practically unnecessary to shift gears; widest range of speeds on high. Such flexibility possible only in a "six" and rare even among "sixes."
- 10.—Absence of vibration.—All moving parts of motor perfectly balanced. Long stroke, six-cylinder motor gives steady pull and sweet running. No intermittent power strokes pounding ceaselessly at bearings, cylinder walls and gears. Upkeep expense reduced to minimum.

WARM WEATHER FURNISHINGS TO KEEP MEN COOL

While our stock of men's warm weather wearables has always been large we think that this season's showing surpasses any of the past offerings, both in size and quality of the values to be found.

As a suggestion of the many interesting items found here, we mention straw hats, light-weight underwear, two-piece suits, negligee shirts, silk and cotton hose, new cravats.

But the most satisfactory way is for you to come and see them. Then you can realize more fully the excellence of the quality and the wide range of styles and values included.
