

**HERE IS A PICTURE OF THE NEW PARKING LOT** now available for motorists in downtown Dwight. The photo was taken before gravel was spread on either side of the concrete slab. This new lot, running along East street, from Franklin St. to the Depot drive in Alton park is large enough for 70 some cars. Entrance may be made only at the Franklin street opening and exit is at the other end of the park. The parking lot became a reality thanks to the Village and the Dwight Rotary Club who have worked hard for the project. The lot will relieve the strain on parking facilities in the business district and is sure to be popular with motorists.
