SORGHUM MACHINERY,

F. C. WELCH, General Agent,
83 and 85 South Canal Street Chicago, Illinois.

THE ONLY REALLY ADJUSTABLE CANE MILL!
Long Tried and Well Liked!
BEST PREMIUMS AT ALL NORTHWESTERN STATE FAIRS!
HIGHEST ENCOMIUMS FROM PRESS AND PUBLIC EVERYWHERE!
THE BEST IS THE CHEAPEST!

THE LEVER PRINCIPLE IN OUR MILLS is the only practicable and reliable mode yet applied for giving adjustability to Sugar Cane Crushers, and the lever and weight is, and must always be, the simplest and most unvarying power. With it the cane is pressed drier with less power and less liability of breakage than by any other mode. These Mills have been before the public for several years; they are extensively used throughout the entire sorghum growing sections of the country, and wherever used have invariably given entire satisfaction. They have been much improved for the present season, and now embrace points of excellence, aside from the leading feature of the lever, which of themselves place them far ahead of any other Mill in use. We build Mills of different sizes, geared to run by steam, water or horse power; also premium Horse Powers, very simple in their construction and of great strength; also an Evaporator of our own patent, equal if not superior to anything now in use; and in fact, every article required by Sorghum Manufacturers.

Our **SORGHUM HAND BOOK**, containing full descriptions and illustrations of our different sized Mills and Sorghum Machinery, and embracing a treatise on the growth and manufacture of Sorghum, sent free on application.

Parties wanting our machinery should send in their orders early, as towards the close of the season we receive more orders than we can possibly fill.
