**OUR TOWN TRUSTEES.**

Last year the village of Dwight was cared for by a non temperance board of trustees who licensed rum shops and applied the money to the improvement of the town, many improvements were then made which—to all present appearances, will be a lasting benefit. The "town fathers" overlooked in person, the work as it progressed and because they did so, there was not wanting carpenters and snivelers to condemn them, and whisper that they used the public money for the purpose of benefitting themselves by furnishing each other employment. No matter how the public money was expended we had then, better walks and better roads than now. Gullies gulches and ditches did not meet the wagoner at every rod he went over within the corporate limits of the town, and accidents were not so frequent. Every day there is some complaint from farmers who dread the last half mile of pike before entering town more than all their other miles of travel. The apathy that is shown in this matter is disgraceful and if it is not soon looked to, we will have many repetitions of the accident that now confines constable Losee to his bed.

Some weeks since president Eldredge issued a flaming proclamation of the Fremont and Pope style—against dogs in general, threatening fiercely many hor-

rid things if said animals were not duly muzzled and otherwise guarded, so as to prevent accident in case of Hydrophobic or rabid animals getting among them without the knowledge of the owners—Are the dogs all muzzled and cared for? No the muzzled dog is the exception, no one paid any attention to the presidents BULL, and dogs enjoy the same liberty as before. "JOAX," sports a dog as big as a cow an ugly looking brute, who amuses himself daily in his unmuzzled license, by "chawing up" small dogs. If that monster, with his pugnacious spirit and Lion like strength, should ever become rabid he would of necessity make bad work before earth was relieved of him. Why make a law, if it is not to be enforced? is the town to pay profusely for printers Ink and buncumbe and nothing come of it? Simmons the Blacksmith also has a brute in his yard that would make better fattening for the earth than many another animal of quieter propensities. He therefore ought to be one of the first PLANTED-people either do not care enough for their dogs to expend the requisite amount of money on them to make them entirely harmless or else they have no faith in the enforcement of any laws that may be passed by a gentlemanly board of imbecile trustees. We hope for a reform in many things but this before others.

**THAT GOPHER.**—If the young(?) lady who by her remarks and comparisons seems to understand the nature and disposition of this little animal so well, wishes to know more of its habits and peculiarities, information will be cheerfully furnished at this office.

During last year over half a million of money—£540, 884—was transmitted to Ireland from America by emigrants to their friends—£202, 944 of the sum being in the form of prepaid passage orders.
